

Who we are

A reliable and robust infrastructure

As a trusted leader in the post-trade industry, Clearstream offers a comprehensive range of innovative solutions for securities issuance, settlement, custody as well as collateral, lending and liquidity management.

What we do

Our values

We provide **safety** and **reliability** to our clients as the backbone of European capital markets, making us a trusted partner in challenging times.

We help clients achieve **operational efficiency** and **risk reduction** as a global multi-network operator by innovating on connectivity, data and collateral as well as liquidity services.

We provide **guidance** and **direction** as we transition into the next generation of post-trade technology with our future-ready platform.

How we support you

Your trusted partner across the globe

Our **international central securities depository (ICSD)** as well as our **central securities depositories (CSDs)** provide post-trade infrastructure and securities services for the international and domestic markets.

In addition to our Issuer-CSD franchises, we operate **links to 60 markets** across the globe, providing direct and secure access to the **largest domestic liquidity pools**.

Covering over 50% of T2S volumes, our German CSD, combined with our extensive link network, is the natural home for a **centralised T2S access** and **central bank money solution**.

Clearstream

Where innovation meets trust

Clearstream's core products are composed of **three** business lines providing services to targeted markets:

Issuer Services and New Digital Markets

Tokenisation of securities and assets paves the way for the digital asset space. Our next-generation platform D7 allows market participants to issue electronic securities efficiently and securely.

Custody and Investor Solutions

We cover the settlement and custody of securities issued in T2S domestic markets where Clearstream's CSDs and ICSD act as investor CSD. The service offering includes internal, Bridge and cross border settlement in commercial and central bank money.

Collateral, Lending and Liquidity Solutions

We offer trusted, secure and transparent triparty collateral management, securities lending and liquidity solutions. Our OSCAR (Own Selection Criteria Automated Reasoning) tool combines AI techniques to enhance automation in collateral management.
