LuxCSD - fee schedule

1. General

This document sets out the fees for services offered by LuxCSD.

1.1 Validity

This fee schedule is valid from 1 August 2016 until further notice. Changes to the fee schedule are communicated to customers via customer announcements and are available on our web site, www.luxcsd.com.

1.2 Payment currency

All fees are expressed and invoiced in EUR.

1.3 Payment terms

Invoicing is carried out monthly. LuxCSD advises customers of the total amount of fees payable at the beginning of the month following the invoice period. All invoices concerning LuxCSD's fees, commissions and other charges for services rendered shall be paid within 15 days after the invoice date concerned. Interest, calculated on the outstanding amount will accrue on overdue invoices from the due date until payment.

1.4 Internet access to invoices

The LuxCSD Billing Portal provides easy online access to customer invoices via our website, www.luxcsd.com under Applications/Billing Portal.

1.5 Instruments

For pricing purposes, instruments are grouped into three categories:

- Debt: Fixed rate eurobonds, fixed rate convertibles, other fixed rate bonds, floating rate notes, certificates of deposit (CDs), short term notes, euro commercial paper and all other bonds;
- Equities: Equities, depository receipts, warrants and rights;
- Investment Funds

2. Safekeeping services

2.1 Main principles

2.1.1 Family groups and account grouping

The notion of family groups and account grouping plays an important role in the determination of safekeeping fees.

The group includes the parent company and all other affiliates, which are more than 50% owned and directly or indirectly controlled by the parent. LuxCSD customers' accounts are automatically allocated to a group.

Family group discount mechanism

The total amount of the group's assets will determine to which family group a customer belongs. All accounts in the same family group will be able to benefit from rates that apply to that family group.

Group	1	2	3	4	5	6	7	8	9	10	11
Group deposit (EUR billion)	≤ 2	2-6	6-14	14-22	22-48	48-90	90-150	150-220	220-300	300-380	> 380

Each family group has its own specific sliding scales. The higher the family group, the more competitive the sliding scale becomes as illustrated in section ["2.1.3 Sliding scales for core markets"](#).

For example, a customer has several accounts and belongs to a group that holds a total of EUR 107 billion of assets under custody with LuxCSD. Therefore, each account benefits from the rates that apply to family group 7.

2.1.2 The core market concept

In addition to the family grouping discount mechanism described above, LuxCSD also groups together the markets in which our customers are most active.

These markets, referred to collectively as “core markets”, are as follows:

International securities¹	Italy
Austria	Netherlands
France	United Kingdom
Germany	United States of America

1. Domestic Luxembourg securities (other than those issued through LuxCSD) held with Clearstream Banking Luxembourg are classified as international securities for pricing purposes.

For pricing purposes, all core market instruments are treated as belonging to one single market.

Separate sliding scales will be applied to the total of core market debt, the total of core market equities and the total of core market investment funds as shown in [“2.1.3 Sliding scales for core markets”](#)

2.1.3 Sliding scales for core markets

There are three sliding scales for core markets: one for debt, one for equities and one for investment funds. Since core markets are grouped together, customers benefit from competitive and achievable marginal rates.

The sliding scales that apply to core markets are as follows:

Debt												
Account deposit (EUR million)		Group deposit (EUR billion)										
From	To	1	2	3	4	5	6	7	8	9	10	11
		≤ 2	2-6	6-14	14-22	22-48	48-90	90-150	150-220	220-300	300-380	> 380

2.1.4 How does the core market concept work?

A customer belonging to a group that holds a total of EUR 50 billion of assets under custody with LuxCSD will benefit from the rates that apply to family group 6.

Debt		
Account deposit (EUR million)		Group deposit (EUR billion)
From	To	6 48-90
0	750	1.10
750	2,000	0.98
2,000	6,000	0.72
6,000	15,000	0.66
15,000	30,000	0.59
30,000	60,000	0.57
> 60,000		0.55

This customer holds EUR 12 billion of core market debt in its main account with LuxCSD. The family group 6 sliding scale for core market debt applies to all of the EUR 12 billion of core market debt in this account.

The charge applicable to EUR 12 billion of core market debt is calculated by applying the appropriate sliding scale rate until the complete holding is accounted for, as follows:

1. The first tranche of EUR 750 million is charged at 1.10 basis points.
2. The next tranche of EUR 1,250 million is charged at 0.98 basis points, the rate applicable to EUR 750 million to EUR 2,000 million.
3. The next tranche of EUR 4,000 million is charged at 0.72 basis points, the rate applicable to EUR 2,000 million to EUR 6,000 million.
4. The final tranche of EUR 6,000 million is charged at 0.66 basis points, the rate applicable to EUR 6,000 million to EUR 15,000 million.

This marginal rate of 0.66 basis points applies to any additional core market debt deposited in the account until the holding exceeds EUR 15,000 million. An even lower marginal rate of 0.59 basis points applies to the holding in excess of EUR 15,000 million.

The core market concept is particularly attractive since it groups the most active markets for pricing purposes.

2.1.5 Specific markets

Specific markets include all markets that are not listed as a core market. These markets are priced by market and by instrument, that is debt, equities or investment funds. When investment fund prices are not listed explicitly for a market, the equity prices will also apply to investment funds.

Details of prices for specific markets can be found in "[Annex 1: Market Prices](#)".

2.2 Monthly deposit value calculation

The basis for the safekeeping fee calculation is:

$$\frac{\text{average daily value of securities in the month} \times \text{number of calendar days in the month}}{360} \times \text{Rate in b.p.}^1$$

1. One basis point (b.p.) = 0.01%

The daily value of securities is fixed after each daytime processing (DTP) and is based on the nominal value of debt securities. For all other securities, prices are collected from recognised data vendors or alternatively from the local agent or the CSD appointed by Clearstream Banking. If the collected security price is below a given minimum price, LuxCSD may apply a default market price. Default prices are given in "[Annex 1: Market Prices](#)".

The deposit value of non-EUR securities is converted into EUR at the exchange rate prevailing at the end of the month.

2.3 Fee calculation example

Customer A holds the following securities in its account:

Holding of Customer A	Average deposit value (EUR million)
International debt	2,000
German debt	1,000
French debt	500
Italian equity	1,000
Finnish equity	275
Total	4,775

2.3.1 How are safekeeping fees calculated?

Step 1: Identify the overall family group to which the customer belongs

Customer A belongs to Group Y whose group deposits total EUR 20 billion across all markets. This means that customer A is allocated to family group 4:

Debt		Group deposit (EUR billion)										
Account deposit (EUR million)		1	2	3	4	5	6	7	8	9	10	11
From	To	≤ 2	2-6	6-14	14-22	22-48	48-90	90-150	150-220	220-300	300-380	> 380

Step 2: Calculate core market fees

1. Bundle together all deposits in core markets, within the same instrument type:

Core debt	Average deposit value (EUR million)	Core equities	Average deposit value (EUR million)
International debt	2,000	Italian equity	1,000
German debt	1,000		
French debt	500		
Total	3,500		1,000

2. Calculate the safekeeping fees for core markets debt based on the relevant sliding scale, within the relevant price column for the group.

For a month with 30 days:

Debt				
Account deposit (EUR million)		Group deposit (EUR billion)	Deposit (EUR million)	Monthly fees (EUR)
From	To	4 14–22		
0	750	1.15	750	7,187.50
750	2,000	1.10	1,250	11,458.33
2,000	6,000	0.89	1,500	11,125.00
6,000	15,000	0.78		
15,000	30,000	0.77		
Total			3,500	29,770.83
Average rate				1.02
Marginal rate for new deposits				0.89

- Calculate the safekeeping fees for core markets equity based on the relevant sliding scale, within the relevant price column for the group.

For a month with 30 days:

Equity				
Account deposit (EUR million)		Group deposit (EUR billion)	Deposit (EUR million)	Monthly fees (EUR)
From	To	4 14–22		
0	70	2.20	70	1,283.33
70	170	2.05	100	1,708.33
170	300	1.60	130	1,733.33
300	600	1.58	300	3,950.00
600	1,500	1.45	400	4,833.33
Total			1,000	13,508.32
Average rate				1.62
Marginal rate for new deposits				1.45

Step 3: Calculate specific market fees

- Separate all deposits in specific markets by instrument and market:

Specific equities	Average deposit value (EUR million)
Finnish equity	275
Total	275

- Calculate the safekeeping fees based on the relevant sliding scale for the specific market, Finland (as shown in "Finland"), within the relevant price column for the group:

Equities				
Account deposit (EUR million)		Group deposit (EUR billion)	Deposit (EUR million)	Monthly fees (EUR)
From	To	4 14–22		
0	50	3.77	50	1,570.33
50	100	2.30	50	958.33
100	300	1.55	175	2,260.42
Total			275	4,789.08
Average rate				2.09
Marginal rate for new deposits				1.55

Step 4: Calculate the total safekeeping fees

Add together the safekeeping fees obtained for core markets and specific markets in order to obtain the total fees due:

Safekeeping fees	Monthly fees (EUR)
Total fees for core debt	29,770.83
Total fees for core equities	13,508.32
Total fees for specific equities	4,789.08
Total safekeeping fee	48,068.23

2.4 Minimum safekeeping fees

A monthly minimum safekeeping fee of EUR 250 is charged per account. If the safekeeping fees payable on an account for a month are less than EUR 250, an additional charge is booked so that the minimum amount is met. In case there is no custody activity, this minimum fee is waived.

3. Settlement services

3.1 Security instruction fees

A security instruction is charged when the instruction is settled, and an external delivery instruction is charged when provisioned. For investment fund transfers on the register, the instruction is charged when received and valid. The fee applied is based on the number of instructions per account during the month.

3.1.1 Internal and Bridge instructions and instructions resulting from trades on trading venues processed via a Central Counterparty (CCP)

Debt and Equity

For combined settlement volumes, there is one sliding scale that applies to both debt and equity instruments across all markets combined per customer account.

The fees are as follows:

From	To	
1	250	2.25

400,001	500,000	0.03
>	500,000	0.02

A separate sliding scale applies to internal instructions in investment funds (other than those issued through LuxCSD) combined per customer account.

The fees are as follows:

Number of instructions - DvP		Price (EUR)
From	To	
1	250	2.25
251	750	2.00

Bridge instructions - investment funds

A separate fee applies to Bridge instructions in investment funds. Please refer to “All markets” on page 28 for details of the settlement fees.

The charge applicable to these 20,000 internal instructions is calculated by applying the appropriate sliding scale rate until all instructions are accounted for, as follows:

1. The first 250 instructions are charged at a price of EUR 2.25 per instruction.
2. The next 500 instructions are charged at a price of EUR 2.00 per instruction.

- If a coupon or a dividend payment is reversed, the related event fee is cancelled.

Annex 1: Market Prices

The following section shows safekeeping fees for each market.

Core markets concept for safekeeping

For pricing purposes, all core market instruments are treated as belonging to one single market. Separate sliding scales will be applied to the total of core market debt, the total of core market equities and the total of core market investment funds.

The core markets are as follows:

International securities¹	Italy
Austria	Netherlands
France	United Kingdom
Germany	United States of America

1. All domestic Luxembourg securities (other than LuxCSD issued securities) are considered to be International securities – see [“2.1.2 The core market concept”](#) on page 3 for more information.

The safekeeping fees have been shaded on the applicable market page for each of the core markets to indicate that holdings in these categories should be bundled prior to performing the fee calculations.

Security instruction fees on internal transactions

For internal instructions, there is one sliding scale that applies to both debt and equity instruments in all markets combined per customer account. A separate sliding scale applies to internal instructions in investment funds across all markets combined per customer account.
