Discover our new LEI online portal

With the aim to provide market participants with enhanced support, LuxCSD has implemented a new online process for the issuance and renewal of Legal Entity Identifiers (LEIs). Registrants can simply submit their requests including all required information to issue or renew their LEI via the dedicated LuxCSD LEI Portal accessible via the LuxCSD web site.

Accredited LOU for many jurisdictions
LuxCSD is a GLEIF accredited Local Operating Unit (LOU) for Luxembourg and 36 other jurisdictions worldwide and has been issuing ISO 17442 compliant LEIs with the prefix 2221 since September 2014.

Growing demand for LEIs globally
Legal Entity Identifiers (LEIs) play an increasingly important role in the transparency debate, data standardisation and in the disclosure frameworks for financial market participants across industry sectors around the world. Growing demand for new LEIs is underpinned by European level regulations in view of increasing the safety of financial markets, such as EMIR, MIFID II/ MIFIR, AIFMD, REMIT, Solvency II, PSD II, CSDR and in 2020 Money Market Fund Regulation. In Asia Pacific, regulators are supporting the use of LEIs in Australia, Singapore, Hong Kong, India and other jurisdictions primarily for activity and reporting of OTC derivatives transactions.

Straight forward process
For registrants who need to obtain an LEI, LuxCSD’s process is straightforward. The ease of access also helps registrants to meet the annual maintenance requirements, so that the entity reference data is kept up-to-date. At renewal date, the LEIs are re-validated by LuxCSD and any change of data is reflected in the published LEI data.

Transfer LEI to LuxCSD
If you are interested in having your LEI data managed by LuxCSD and benefit from our support, please send an email to lei.service@luxcsd.com

Multilingual support
The online registration is supported by user guides and customer documentation. Our Luxembourg based LEI Service team will ensure your individual questions are answered.

Evolving standards
The renewal process enables the registrant to modify the LEI record and to extend the validity of an existing LEI. In accordance with the LEI Regulatory Oversight Committee (ROC) and many regulations, every LEI should be renewed at least once a year.

The challenge process enables the registrant or third party to request a correction or modification of the LEI record, subject to validation. A challenge will not extend the validity of the LEI. Challenges are free of charge and can be used, for example in the case the legal entity changes their legal name or address as long as the change can be confirmed. Challenges of own or third party LEIs of LuxCSD LEI portal registrants can be done directly via the portal. For challenges to data managed by other LOUs, requests can be initiated through a centralised facility at GLEIF.

Investment funds
The Regulatory Oversight Committee (ROC) has published the final policy on fund relationships and guidelines for the registration of investment funds in the Global LEI System. It incorporates the feedback from consultations with key stakeholders in the global LEI system. This guidance will be implemented in forthcoming standards to be issued by GLEIF in 2020.

Did you know
– LEIs are being mapped to ISINs and BICs
– LEIs are transforming banks’ client lifecycle management
