1. Introduction

1.1 Structure and content of this document

This document focuses on the Corporate Action Harmonisation (CAH) project of Clearstream and more specifically on the [first two phases of](#) KADI DE Migration to OneClearstream Asset Servicing (OneCAS) and related activities.

The objective of these Detailed Functional Specifications is to provide clients with an overview regarding the changes that come with the KADI DE Migration to OneCAS [Phase 1 and Phase 2](#) as well as the tasks involved in preparing for migration.

After the introduction chapter on the CAH project:

- Chapter 2 summarises the key aspects of the KADI DE Migration to OneCAS to be introduced in 2024. It also shows open points, for which no information can currently be provided and which will be covered in an updated version of the document.
- Chapter 3 provides an in-depth look into the upcoming changes of handling of corporate action events. It describes current and future states of the processing and reporting in the Clearstream systems KADI and Custody, enabling clients to identify areas of impact for them.
- Chapter 4 specifies changes with regard to client connectivity, that is the reporting of corporate actions events and the usage of user interfaces.
- Chapter 5 offers clients a concise overview of all client impacts.
- Chapter 6 summarises the most important aspects of the client simulation. A detailed Client Simulation Guide will be provided in due course.
- Chapter 7 provides an overview of the migration activities surrounding the implementation weekend of the KADI DE Migration. More detailed information on the migration will be provided to clients in due time.

1.2 General Overview

The current Clearstream Asset Services roadmap is about modernisation, harmonisation and standardisation with the aim to enhance the OneClearstream service offering. As part of this initiative, the Corporate Actions Harmonisation (CAH) project and especially the migration of the processing for CBF-issued securities from CBF Legacy system KADI to OneClearstream Asset Servicing (CAH – KADI DE migration to OneCAS) have been established focusing on the following aspects:

- Reduction of the technology debt and modernisation of the infrastructure.
- Functional simplification and harmonisation achieved through the consolidation of the processing environments.
- Reduce complexity of operating dual asset servicing processing on different technical platforms - KADI versus Custody.

The first driver for the change is the Asset Services processing standardisation. It is an enabler for the future business/regulatory developments. The current dual processing environment for corporate actions creates extra complexity in the context of implementing the new standards resulting from the adherence to Shareholder's Rights Directive II (SRD II, Q3 2021), the European Collateral Management System and AMI-SeCo Single Collateral Management Rulebook for Europe Standards (ECMS/SCoRE, [Q4 2024](#)) and requirements to support the new ISO 20022 standards.

The second driver for the Corporate Actions Harmonisation project is linked to the setup of the OneClearstream Asset Services, which started with the continuously expanding OneClearstream Service Offering applied for Investor-CSD links (that is, non CBF issued securities). Migrating the CBF-issued securities to OneCAS is therefore the next step for Clearstream in reaching the goal to fully operate OneClearstream Asset Services, providing a harmonised environment for corporate action processing, in compliance with all the new European standards (as mentioned above).

The expected benefit for clients comes with the harmonisation and standardisation of processing and reporting across OneClearstream asset servicing for all markets. That is, clients processes and messaging formats which are currently deviating for the German market will be aligned, if possible, with international standards such as the CASG standards, SCoRE standards or the SMPG guidelines for reporting.

1.3 Timeline

The CA Harmonisation project is implemented over multiple instances.

13 June 2022 – Implementation of new corporate action events and option types

Clearstream expands the supported event and option types for MT564 corporate action notifications.

More detailed information has been published in Announcement [C21059](#).

3 July 2023 – KADI DE Migration (Phase 1)

In 2023, corporate actions processing for CBF-issued securities with the exception of investment funds and non-T2S-eligible securities are migrated to the OneCAS platform and additional changes are implemented to the processing of corporate actions for other markets.

The purpose of these Detailed Functional Specifications is to provide a comprehensive overview of these changes. Additional information to clients is available in the following documents:

- [Simulation Guide](#) including more information on the simulation approach, timelines and test cases;
- [Migration Guide](#) including a detailed overview regarding the migration/cut-over procedures.

1 July 2024 – KADI DE Migration (Phase 2): Investment funds and remaining Phase 1 securities

[In 2024, corporate actions processing will be migrated to the OneCAS platform for the remaining DE market, that is, CBF-issued investment funds, individual certificates and securities with a non-DE taxable country.](#)

[The Detailed Functional Specifications provide a comprehensive overview of these changes.](#)

[Clearstream will further provide clients with the following documents on the website in due time:](#)

- [Update to the Simulation Guide;](#)
- [Update to the Migration Guide;](#)
- [List of impacted ISINs.](#)

November 2025 – KADI US/CH Migration (Phase 3)

Finally, from November 2025 ([exact date to be confirmed](#)) on, further markets will be migrated to the OneClearstream Asset Services platform step by step.

More details will be provided separately in due time.

Figure 1: Indicative KADI migration timeline

2. Key aspects of KADI DE Migration

This summary provides an overview of the key implementation features for the KADI DE Migration.

In general, the KADI DE Migration affects all CBF-issued (Lagerland 099) securities, [in Phase 2](#) investment funds and interim funds (GD198B 5000 and B003 respectively) [will be migrated, as well as](#) 180 individual certificates [and German securities with a non-DE taxable country. Phase 3 will see the finalisation of the KADI migration with US and CH securities.](#)

Please note that unlike previous migrations as part of OneClearstream (for LMP markets), the field GD518E (LMP start date) will not be filled for the migrated DE securities.

All corporate action and income events for these securities, that is all mandatory as well as voluntary events, – with the exception of TEFRA D and meeting events – will be processed in OneCAS from [1 July 2024](#) on. The migration of meeting events is planned for [18 November 2024](#) (please refer to [Announcement D23014](#)).

Additionally, occasional changes to the current processing in OneCAS are introduced. That is, the corporate action processing for non-German securities is adapted.

Current processes and future changes for securities or events which are out of scope of the KADI DE Migration, such as [CH/US securities](#), are not described in this document.

With the overarching goal of corporate action harmonisation and adherence to global market standards in mind, Clearstream has taken the approach of aligning the corporate action processing for CBF-issued securities to the existing processing in OneCAS for other markets. For certain corporate action events and processes, a complete harmonisation is not possible at this point in time due to deviating market practices and legislation. In those cases, Clearstream will generally enhance the OneCAS platform in order to continue offering corporate actions processing for CBF-issued securities which corresponds to the existing KADI-processes.

In this document, “income events” include interest payments, dividends, capital gains and redemption payments. Interest payments and redemption events are usually part of the official terms and conditions of the issued securities. In addition, once an issuer decides to start an income event, it will have to advise all relevant parties in the market (usually in official documentation or offer prospectus) about all aspects of the event. All other events are considered “non-income” events and can be classified as either “mandatory” or “voluntary” events depending on whether all clients are required to participate in the event.

2.1 Security scope

Generally, the KADI DE Migration to OneCAS concerns securities that have been issued by CBF. Those can be identified via the value “99” (Germany) in WSS/WM-field GD430.

Among those securities, the following securities are [included in the KADI DE Migration to OneCAS Phase 2](#) scope:

- Securities being a fund, identified via the values “5000” (Investment Funds) or “B003” (Interim Fund) in WSS/WM-field GD198B;
- [Securities being individual certificates, identified via the values “1” \(Corpus and coupon sheet detached\) in WSS/WM-field GD481 and “1000” \(equity\) in the WSS/WM-field GD198B;](#)
- [German securities with a non-DE taxable country.](#)

[The following securities are excluded from the KADI DE Migration to OneCAS Phase 2 scope:](#)

- [Securities not being T2S-eligible, identified via the values “2” \(jacket custody\) and “3” \(trust custody\) in WSS/WM-field GD135 or via the value “4” \(AKV\) in WSS/WM-field GD135 with the value for the WSS/WM-field GD400 being different than “60” \(NCSC-T\).](#)

Please note that clients cannot identify securities migrated to OneClearstream directly in the security static data, for example via the field “LMP-Datum ab” (GD518E).

2.2 Event scope

Generally, the KADI DE Migration to OneCAS concerns corporate action events in the above specified securities. Any event for which the basis security is not in scope will not be migrated, including in the case of two-event setups (for instance, TA210 + TA280)

The following corporate action events are **excluded** from the scope of KADI DE Migration to OneCAS:

- Meeting events (BMET, CMET, OMET, XMET) → [planned for November 2024 with SCE](#);
- TEFRA D events (CERT) → [planned for November 2024](#);
- Class action events (CLSA) → [not applicable to German securities](#).

[For Phase 2, a](#) corporate event with an entitlement date (ED) prior to the migration (that is, [1 July 2024](#) is [later](#) than ED) will be processed by the CBF Legacy functionality in KADI and clients will receive the reporting in the Legacy formats, including information via the current online functionality, for example KVGI. Any further updates as well as tax bookings related to those events that were processed prior to the migration will also be handled by the CBF Legacy systems, providing clients with the currently known reporting. Please refer to section 4.1 for more details on the excluded events.

3. Functional Specifications – Asset Servicing

This chapter provides information regarding the future corporate action processing in the OneClearstream system. The focus of this document is on the changes resulting [from KADI DE Migration Phase 1](#) (started on 1 July 2023 and currently ongoing) and Phase 2 (scheduled for 1 July 2024). That is, current processes and future changes for German investment funds or CH and US securities are not in scope of this chapter.

With the go-live of the KADI DE Migration on [1 July 2024](#), the corporate action processing for CBF-issued [investment funds and the remaining Phase 1 securities](#) will be offered via OneCAS. Whenever not explicitly explained in the [following](#) sections, the processing rules follow the already existing definitions in KADI but will be executed via OneCAS.

Please note that this document does not describe each (sub)process in detail. The document describes only as much detail as required to explain the functional logic and sequence of the processes. Please refer to the [CBF Client Handbook](#) and the [OneClearstream Client Handbook](#) for more detailed documentation on already existing processes in KADI and OneCAS respectively.

3.1 Announcement Capture and Event Creation

This chapter describes the changes for the announcement of corporate action events. Whenever not explicitly mentioned, current rules regarding the scope and the underlying data of events remain the same as they are at present. Please refer to the [CBF Client Handbook](#) and the [OneClearstream Client Handbook](#) for more detailed documentation on already existing processes in KADI and OneCAS, respectively.

Event source

Clearstream receives information regarding a corporate action event from the market and passes this information on to the clients via MT564 event announcement.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	<p>WM remains the primary event data source.</p> <p>For some events, the first announcement might be sent before WM data is received.</p>
	<p>Events are announced on the basis of data received from Wertpapier Mitteilungen (WM)-Datenservice and the issuer agents.</p>	<p>Events are announced on the basis of data received from Wertpapier Mitteilungen (WM)-Datenservice and the issuer agents.</p> <p>Furthermore, for predictable events (such as income, redemption), it will be possible that OneCAS will announce the event prior to receiving the information of WM (i.e. more than 30 days before entitlement date).</p> <p>In this case, the COAF cannot be reported. Once WM event data is received, the notification will be updated accordingly and the COAF will be provided.</p>	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	<p>Events are announced on the basis of data received from local sources, such as custodians, issuer CSDs, issuers, agents as well as independent information vendors.</p>	<p>Events are announced on the basis of data received from local sources, such as custodians, issuer CSDs, issuers, agents as well as independent information vendors.</p>	

COAF

The COAF (Corporate Action Event Reference) is a unique reference assigned by the respective issuer CSDs or national numbering agencies to identify a corporate action event. In the event announcement (MT564), it is communicated in the field :20C::COAF//16x.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	No impact
	The COAF is determined and communicated by the German National numbering agency, WM Datenservice.	The COAF is determined and communicated by the German National numbering agency, WM Datenservice.	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	When the COAF is provided to Clearstream from the respective market (local partners, depositories), it will be included in the reporting to clients.	When the COAF is provided to Clearstream from the respective market (local partners, depositories), it will be included in the reporting to clients.	

CORP ID structure

The CORP ID is a unique reference assigned by Clearstream to identify a corporate action event. In the event announcement (MT564), it is communicated in the field :20C::CORP//16x.

Clients need to include the originally announced CORP ID when sending instructions to Clearstream.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	The CORP ID to be used in announcements and in clients instructions will be created differently (Terminart and BID will no longer be provided, reference format and length will be different for income and non-income events)
	The CORP ID is composed of the three-digit event type code ("Terminart") and the BID provided by WM. Example: :20C::CORP//1100000020151110	The CORP ID is a reference which is increased by one for every subsequent event. Clearstream currently has two ways to generate the CORP ID: Mostly for income events, all 16 digits are used to display the counting event number with leading zeroes. For all other events, the CORP ID starts with "AC" followed by the counting event number. Examples: Income: :20C::CORP//0000000123456789 Else: :20C::CORP//AC12345	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	The CORP ID is a reference which is increased by one for every subsequent event. Clearstream currently has two ways to generate the CORP ID: Mostly for income events, all 16 digits are used to display the counting event number with leading zeroes. For all other events, the CORP ID starts with "AC" followed by the counting event number. Examples: Income: :20C::CORP//0000000123456789 Else: :20C::CORP//AC12345	The CORP ID is a reference which is increased by one for every subsequent event. Clearstream currently has two ways to generate the CORP ID: Mostly for income events, all 16 digits are used to display the counting event number with leading zeroes. For all other events, the CORP ID starts with "AC" followed by the counting event number. Examples: Income: :20C::CORP//0000000123456789 Else: :20C::CORP//AC12345	

Events split into multiple announcements

Certain corporate action events may be split into multiple parts for processing reasons or result in the crediting or debiting of multiple security proceeds for the client.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	Clearstream will generally announce and process corporate action events within one single event instead of splitting into multiple events.
	<p>One corporate action event for each security proceed is announced and processed.</p> <p>For linked events to debit the basis security of the event - for example, the debit of worthless securities (TA222) after the exercise of warrants (TA122) -, separate events are announced and processed.</p> <p>The events have different referencing (CORP ID), but there are artificial dependencies between them.</p>	<p>One corporate action event for all security proceeds is announced and processed.</p> <p>One corporate action event for all linked events is announced and processed.</p> <p>Clearstream reserves the possibility to announce multiple events in cases where this is justified or required from a business or technical point of view.</p>	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	<p>One corporate action event for all security proceeds is announced and processed.</p> <p>One corporate action event for all linked events is announced and processed.</p>	<p>One corporate action event for all security proceeds is announced and processed.</p> <p>One corporate action event for all linked events is announced and processed.</p>	

Note: Clients should be aware that corporate action events announced in this way may differ from the corporate action events announced by Wertpapier-Mitteilungen. As per the information currently available to Clearstream, this difference should be resolved with the implementation of [EDDY Neu project](#).

Processing of warrants

In the event of an automatic cash exercise for warrants, Clearstream provides a payment to the entitled clients, withdraws the exercised or matured positions and sets the T2S Maturity Date to prevent any further trading in the warrant.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	No impact
	No technical movements on warrants are reported.	No technical movements on warrants are reported.	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	Reporting on the technical movements will no longer be available to clients. This change will have an impact on all Clearstream clients (CBF/CBL and Lux CSD) as processing will be amended on CBL side for all Markets.
	Technical movements are reported via MT564: <ol style="list-style-type: none"> 1. Debit of parent security; 2. Credit of technical ISIN; 3. Debit of technical ISIN; 4. Credit of cash. Example from MT564 (CORP AC13958721): :16R:SECMOVE :22H::CRDB//DEBT :35B:ISIN GB00B8SVK441 /XS/160769220 WAR BARCLAYS BK PLC (CALL) 070422 :16S:SECMOVE :22H::CRDB//CRED :35B:/XS/028204124 WAR TECHNICAL CODE FOR UNKNOWN PROC EEDS XXXXX :16S:SECMOVE :22H::CRDB//DEBT :35B:/XS/028204124 WAR TECHNICAL CODE FOR UNKNOWN PROC EEDS XXXXX :16S:SECMOVE	No technical movements on warrants are reported.	

	As-is process	Future process	CBF client impact
	:16R:CASHMOVE :22H::CRDB//CRED :16S:CASHMOVE		

Please note that for CBL and LuxCSD clients, the changes described for non-CBF-issued securities apply for all markets.

Reporting of Warrants

EXWA MAND:

Today in KADI, Clearstream will notify clients about mandatory warrants exercise event EXWA MAND via Swift MT564 in TA281 message providing two choice options:

- 1) E-EXER – to exercise the warrants.
- 2) E-LAPS – to allow event or entitled security to expire

At maturity EXWA MAND with one option will be reported.

Pre-Advice for withdrawal with cash compensation: MT564 in TA122	EXWA	MAND	22F::CAOP//EXER Secmove: debit warrant Cashmove: credit cash
Pre-Advice for worthless withdrawal: MT564 in TA222	EXWA	MAND	22F::CAOP//EXER Secmove: debit warrant

In OneCAS, Clearstream will notify clients about mandatory Warrants exercise event with choice at issuer level (EXWA MAND) via Swift MT564 message providing two choice options:

- 1) E-EXER – to exercise the warrants.
- 2) E-LAPS – to allow event or entitled security to expire

At maturity EXWA MAND remains and one of the options stays active, while the other will be deactivated.

For EXWA MAND, no RDDT is reported.

(I) Withdrawal with cash payment

Step	Reporting
Announcement	MT564 with EXWA MAND and the options E-EXER and E-LAPS
Maturity	MT564 with EXWA MAND and the options E-EXER (default/active) and E-LAPS (inactive)
Payment confirmation	MT566 with EXWA and option E-EXER

(II) Worthless Withdrawal

Step	Reporting
Announcement	MT564 with EXWA MAND and the options E-EXER and E-LAPS
Maturity	MT564 with EXWA MAND and the options E-EXER (inactive) and E-LAPS (default/active)
Payment confirmation	MT566 with EXWA and option E-LAPS

When the option is known at maturity, the deactivated option in the MT564 is marked by the qualifier :22F::OSTA//INTV (option status: Inactive) while the active option receives the qualifier :17B::DFLT//Y (Default Option: Yes).

EXWA CHOS:

In KADI, Clearstream will notify clients about Voluntary conversion and automatic exercise event EXWA CHOS via Swift MT564 in TA281 message providing two choice options:

- 1) E-EXER – to exercise the warrants.
- 2) E-LAPS – to allow event or entitled security to expire

At maturity EXWA CHOS with one option will be reported.

Pre-Advice for withdrawal with cash compensation: MT564 in TA122	EXWA	CHOS	22F::CAOP//EXER Secmove: debit warrant Cashmove: credit cash
Pre-Advice for worthless withdrawal: MT564 in TA222	EXWA	CHOS	22F::CAOP//EXER Secmove: debit warrant

In OneCAS, Clearstream will notify their clients about voluntary Warrants exercise event with a mandatory ending (EXWA CHOS) via Swift MT564 message providing two options:

- 1) E-EXER – to exercise the warrants.
- 2) E-LAPS – to allow event or entitled security to expire

At maturity, EXWA CHOS remains and one of the options stays active, while the other will be deactivated.

(I) Withdrawal with cash payment

Step	Reporting
Announcement	MT564 with EXWA CHOS and the options E-EXER and E-LAPS
Maturity	MT564 with EXWA CHOS and the options E-EXER (default/active) and E-LAPS (inactive)
Payment confirmation	MT566 with EXWA and option E-EXER

(II) Worthless Withdrawal

Step	Reporting
Announcement	MT564 with EXWA CHOS and the options E-EXER and E-LAPS
Maturity	MT564 with EXWA CHOS and the options E-EXER (inactive) and E-LAPS (default/active)
Payment confirmation	MT566 with EXWA and option E-LAPS

When the option is known at maturity, the deactivated option in the MT564 is marked by the qualifier :22F::OSTA//INTV (option status: Inactive) while the active option receives the qualifier :17B::DFLT//Y (Default Option: Yes).

EXWA VOLU:

In KADI, Clearstream will notify clients about voluntary Warrants exercise event with choice where client can provide feedback (EXWA VOLU) via Swift MT564 message.

At maturity the option chosen by client will apply. If no notification received from client, the default option E-NOAC will be applied.

If the client opts for the EXER option, they will receive payment confirmation via Swift MT566 message.

In OneCAS, Clearstream will notify clients about voluntary Warrants exercise event with choice where client can provide feedback (EXWA VOLU) via Swift MT564 message.

At maturity the option chosen by client will apply. If no notification received from client, the default option E-NOAC will be applied.

If client opts for the EXER option, they will receive payment confirmation via Swift MT566 message.

Step	Reporting
Announcement	MT564 with EXWA VOLU and the options E-EXER and E-NOAC
Maturity	MT564 with the default option will be applied at the end of maturity (mostly NOAC)
Payment confirmation (in case option EXER is chosen)	MT566 with EXWA and option E-EXER

3.2 Event Reference Data

No changes will be made to the current usage of event reference data when creating and processing a corporate action event. That is, corporate action events in migrated CBF-issued securities will continue to use WM and issuer agents as the main data source.

3.3 Payments

This chapter describes the changes for the processing of corporate action proceeds. Whenever not explicitly mentioned, current payment rules regarding the processing (for example, pooled payment or sequenced payment) remain the same as they are at present. Please refer to the [CBF Client Handbook](#) and the [OneClearstream Client Handbook](#) for more detailed documentation on already existing processes in KADI and OneCAS, respectively.

T2S DCA

With the implementation of the [German model for corporate action cash payments in June 2020](#), cash payments in EUR for securities where CBF is the Issuer-CSD were generally moved from TARGET2 to the TARGET2-Securities (T2S) platform.

For certain processes and payment scenarios, this transition was not entirely completed in June 2020 and subsequent enhancements in November 2021.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	The T2 account is no longer used for any EUR payments resulting from corporate actions.
	For the following processes, the T2 account is used: <ul style="list-style-type: none"> Debit of subscription right payments (debit of subscription price); Manual bookings, if any; Collateral Mobility: GC pooling payments for T2S eligible baskets settled in EUR. All other EUR payments use the T2S DCA.	All EUR payments use the T2S DCA.	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	All EUR payments use the T2S DCA.	All EUR payments use the T2S DCA.	

Please note that this change is applicable as of 20 March 2023 already (please refer to [Announcement D23002](#)).

Blocking of securities versus direct debit for elective events

After an exercised voluntary corporate action event with an interim line, Clearstream processes the client instruction by debiting the parent line.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI Clearstream directly debits the original ISIN from the client account. A MT566 is provided after execution of the transfer. For EXRI events, positions are first blocked on sub-account 850 before performing the debit.	OneCAS Clearstream always first transfers the instructed quantity to the block position type (BLCA), resulting in a reporting via MT567 IPRC//PACK. This is translated by CASCADE as a move to the dedicated sub-account 851. In T2S, this account is not visible, it is a blocked position. After that, Clearstream debits the securities from the block position. A MT566 is provided after execution of the transfer.	Instructed positions are always blocked before being debited, not only for EXRI events.
	Non-CBF-issued securities (except US, CH)	OneCAS Clearstream first transfers the instructed quantity to the block position type (BLCA), resulting in a reporting via MT567 IPRC//PACK. After that, Clearstream debits the securities from the block position. A MT566 is provided after execution of the transfer.	

The blocking of positions for CBF clients currently using KADI will in the future be performed by moving the positions to sub-account 851 instead of 850. Clearstream will open the necessary sub-account for the clients, if necessary.

Fraction handling

Corporate action events with a security option may end with fractions.

Example: Spin-off with 2:1 ratio. For a position of 3 securities, client would be entitled to 1.5 resulting securities. However, with the minimum tradeable quantity being 1, client can only receive one share. The remaining fraction of 0.5 is usually paid out (cash in lieu) if agreed with and supported by the issuer.

	As-is process	Future process	CBF client impact
CBF-issued securities (except investment funds)	KADI	OneCAS	CBF will directly pay out the cash compensation from fractional (interim ISIN) positions to clients instead of the paying agent
	<p>Whenever a corporate action ends with fractions, it is handled via a separate interim line (temporary ISIN) that is created and distributed to entitled clients, if applicable.</p> <p>Clients may then use exercise period to exchange the interim line for the resulting securities or exchange it for cash with the main paying agent according to the internally regulated positions of beneficial owners.</p> <p>After the exercise period, Clearstream, on behalf of the client, will exchange any uninstructed positions for the resulting securities (using a SECU option). Remaining fractional positions will be compensated in cash using a instruction (with SELL option).</p>	<p>Whenever a corporate action ends with fractions, it is handled via a separate interim line (temporary ISIN) that is created and distributed to entitled clients, if applicable.</p> <p>Clients may then use the exercise period to exchange the interim line for the resulting securities or exchange it for cash with CBF according to the internally regulated positions of beneficial owners.</p> <p>After the exercise period, Clearstream, on behalf of the client, will exchange any uninstructed positions for the resulting securities (using a SECU option). Remaining fractional positions will be compensated in cash (with SELL option).</p>	
<u>CBF-issued investment funds</u>	<u>KADI</u>	<u>OneCAS</u>	<u>CBF will directly pay out the cash compensation.</u>
	<p><u>Whenever a corporate action with a (SECU) ratio ends with fractions:</u></p> <ul style="list-style-type: none"> <u>CBF will increase the number of decimals on the new ISIN during the event exercise period.</u> <u>It is followed by a pure manual process between Clearstream and Agent banks to compensate the fractions and re-affect the original decimals number to the new ISIN.</u> <u>Cash compensations to the clients are paid only after issuer agents provide the cash. This can take place anytime from the payment</u> 	<p><u>Whenever a corporate action with a (SECU) ratio ends with fractions:</u></p> <ul style="list-style-type: none"> <u>Agent bank will be debited by the number of securities to be distributed and debited by the amount of cash in lieu for fraction cash compensation.</u> <u>Issuance of the new ISIN still based on the rounding (old ISIN issuance positions * ratio) will remain the same.</u> <p><u>The email to the Agent contains the following information:</u></p> <ul style="list-style-type: none"> <u>Issuance of the new ISIN being rounding (old ISIN issuance positions * ratio);</u> <u>Number of securities being distributed by CBF, being the</u> 	

	As-is process	Future process	CBF client impact
	<p><u>date up to six months following the payment date.</u></p>	<p><u>sum of new ISIN across all entitled accounts;</u></p> <ul style="list-style-type: none"> • <u>Quantity for the cash compensation;</u> • <u>Cash compensation if fraction price is known.</u> <p><u>The IPAR and Agent reports include the effective securities debit quantity being the sum of the new ISIN distributed to the client. This means that the SECU DEBT Qty will not correspond to the total quantity rounding (entitlement * ratio).</u></p> <p><u>Agent banks are requested to provide the price before the Record date. If the price is not mentioned in the announcements before Record date and only provided later, Clearstream will make fractional cash payments to the clients later.</u></p> <p><u>Agent bank accounts will be debited (new ISIN) immediately on payment date as soon as there are enough holdings available in the account. If holdings are insufficient, instructions will remain pending.</u></p> <p>Example:</p> <p><u>If there are 1200 on issuance account (as entitlement) and ratio is 10:1:</u></p> <ul style="list-style-type: none"> • <u>1200 * 1/10 : 120 new ISIN to be debited from agent account but with the fraction on the client account, Clearstream might debit 112.</u> • <u>Hence, in the agents account for entitled quantity 1200, a quantity of 112 new ISIN will be debited.</u> • <u>8 shares remain on the agent account to be sold in the market to provide cash to Clearstream.</u> • <u>Fractions cash compensation will be done by Clearstream.</u> 	

Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	Whenever a corporate action ends with fractions, the cash equivalent of fractional positions will be directly (without interim line) credited to the client's DCA, if applicable. The cash equivalent is either <ul style="list-style-type: none"> a pre-agreed price with the Issuer or Agent; the market value as determined by the local market representative or agent; or the up-to-date market value at which the securities are traded on the local exchange. 	Whenever a corporate action ends with fractions, the cash equivalent of fractional positions will be directly (without interim line) credited to the client's DCA, if applicable. The cash equivalent is either <ul style="list-style-type: none"> a pre-agreed price with the Issuer or Agent; the market value as determined by the local market representative or agent; or the up-to-date market value at which the securities are traded on the local exchange. 	

Please note that for CBL and LuxCSD clients processing DE securities, the usage of interim lines is introduced. That is, clients will receive the interim line and need to exchange it for the resulting securities or cash.

Narrative structure

In the corporate action confirmation message (MT566), Clearstream provides a narrative to further inform on details of the payment.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	The content of the narrative will change. Information such as the Terminart (KADI event type) or the BID will no longer be provided in the narrative.
	Content of the narrative of automated instructions: <ul style="list-style-type: none"> TERMINART (3-digit code); BID (13-digit WM key); Narrative event description (only FoP instruction); KADI-LAUF-NR (5 digits). Example PFoD: 122 2020110446800 87041 Example FoP: 231 2021092825500 DE000GF6YL10 TILGUNG IN WERTPAPIEREN 86839	Content of the narrative of automated instructions: <ul style="list-style-type: none"> Event type (4-letter Swift code); Direction or reason of the event (CRED or DEBT); Underlying event basis ISIN; Payment date (DDMONYY). Second line: <ul style="list-style-type: none"> Market team; Entitled quantity (with different format); Additional information – if available – in further lines. DVOP CHOS

A DVOP CHOS dividend event contains an option for the client to either receive the dividend in cash or instead receive new securities.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	No impact
	The DVOP CHOS event consists of multiple events: <ol style="list-style-type: none"> 1. RHDI/MAND for the booking of the interim line. 2. DVCA/MAND for the taxable part of the dividend payment. 3. DVOP/CHOS with security and cash option. For the former, a second interim line is credited. 4. EXOF/MAND for the exchange of second interim line to resulting securities. 	The DVOP CHOS event consists of multiple events: <ol style="list-style-type: none"> 1. RHDI/MAND for the booking of the interim line. 2. DVCA/MAND for the taxable part of the dividend payment. 3. DVOP/CHOS with security and cash option. For the former, a second interim line is credited. 4. EXOF/MAND for the exchange of second interim line to resulting securities. 	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	The DVOP CHOS event consists of one event: <ol style="list-style-type: none"> 1. DVOP/CHOS with security and cash option. For the former, the resulting securities are directly booked. 	The DVOP CHOS event consists of one event: <ol style="list-style-type: none"> 1. DVOP/CHOS with security and cash option. For the former, the resulting securities are directly booked. 	

Please note that for CBF clients currently using the optional service offering in OneCAS and for CBL clients, this results in a processing change for CBF-issued securities. Similar to the current OneCAS processing, there is currently no EXOF/MAND event for these clients.

With the KADI DE Migration, the current OneCAS and CBL Asset Servicing service will be amended to streamline the processing of DVOP CHOS for CBF-issued securities in line with German market practices.

That is, three additional events are processed: The RHDI/MAND event in order to distribute the first interim line, the DVCA/MAND event for the taxable part of the dividend payment and the EXOF/MAND event where the second interim line received in the DVOP/CHOS event will be exchanged into the resulting security.

Partial redemption

In the event of a partial redemption before maturity without pool factor reduction (PCAL), Clearstream blocks the redeeming securities in order to prevent any change in position.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI Redeeming positions are only blocked at the end of the entitlement day when there is a full business day between the entitlement date and the payment date. Securities quoted as percentage are set up to show the face amount instead of a percentage in the reporting to avoid rounding problems. Example: :16R:CASHMOVE :22H::CRDB//CRED :98A::PAYD//20220311 :98A::VALU//20220311 :92A::RATE//89,594 :90A::OFFR//ACTU/950, :16S:CASHMOVE	OneCAS Redeeming positions will always be blocked at the end of the entitlement day. Securities quoted as percentage are reported as percentage. Example: :16R:CASHMOVE :22H::CRDB//CRED :98A::PAYD//20220311 :98A::VALU//20220311 :92A::RATE//89,594 :90A::OFFR//PRCT/100, :16S:CASHMOVE	Redeeming positions will be blocked in any case, resulting in the respective reporting. Securities quoted as percentage are reported as percentage.
	Non-CBF-issued securities (except US, CH)	OneCAS Redeeming positions will always be blocked at the end of the entitlement day. Securities quoted as percentage are reported as percentage.	

CORP ID over the entire corporate action event

The CORP ID is an unique reference assigned by Clearstream to identify a corporate action event. In the event announcement (MT564), it is communicated in the field :20C::CORP//16x.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI The CORP ID provided during the booking of security proceeds may, depending on the corporate action event, differ from the CORP ID initially announced. Example (exercise of warrants): Initially announced: :20C::CORP//1222020012980600 Used in MT566 (cash credit): :20C::CORP//1222020012980600 Used in MT566 (debit of securities): :20C::CORP//2222020012980600	OneCAS The CORP ID stays the same through the entire corporate action event. That is, the initially announced CORP ID is also used for the booking of proceeds (MT566, PFoD etc.) Example: Initially announced: :20C::CORP//AC12345 Used in MT566 (cash credit and debit of securities): :20C::CORP//AC12345	The CORP ID will no longer change through the corporate action event but always stay the same
	Non-CBF-issued securities (except US, CH)	OneCAS The CORP ID stays the same through the entire corporate action event. That is, the initially announced CORP ID is also used for the booking of proceeds (MT566, PFoD etc.) Example: Initially announced: :20C::CORP//AC12345 Used in MT566: :20C::CORP//AC12345	

PFOD model

Clearstream processes income distributions on stock via PFoD instructions.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	No impact
	PFoDs as part of income distributions are instructed "net", that is, the tax processing is included. PFoDs generated as part of market claims are instructed "gross", that is, the tax is processed separately.	PFoDs as part of income distributions are instructed "net", that is, the tax processing is included. PFoDs generated as part of market claims are instructed "gross", that is, the tax is processed separately.	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	PFoDs are generally instructed "net", that is, the tax processing is included. If no information on tax rate and/or status are available, "gross" processing applies.	PFoDs are generally instructed "net", that is, the tax processing is included. If no information on tax rate and/or status are available, "gross" processing applies.	

Please note that the processing for CBL and LuxCSD clients on the German market changes as PFoDs generated as part of market claims will in the future be created "gross" with a separate tax adjustment. That is, for PFoDs generated as part of market claims, instead of one "net" PFoD instruction, there are two PFoD instructions:

- First, a "gross" transaction which does not consider the tax deduction;
- Second, an overnight tax adjustment to get to the same "net" result as before.

When the first PFoD is a debit, then the later tax adjustment is a credit processed via a Clearstream transfer account. Accordingly, clients receive reporting for two PFoDs with their respective amounts.

Please be aware that one bulk tax adjustment instruction for the re-crediting of tax payments will be created at the end of every day (starting on entitlement date and running on a daily basis until the end of the market claim period). A corresponding report to explain the different daily market claim tax adjustment instructions will be provided ("Tax Credit Report").

The tax adjustment debit is processed market claim per market claim and is generated at the same time as the compensation instruction.

3.4 Registered shares

No changes will be made to the current processing of corporate action events for registered shares.

However, please be aware that internal instruction with instruction type AA01 P are not sent to T2S and are therefore not eligible for OneCAS transaction management. Please refer to the subchapter "[Internal instructions \[AA01 P\]](#)" for details.

3.5 Decision management

This chapter describes the changes for the processing of client instructions during corporate action events. Whenever not explicitly mentioned, current processing rules remain the same as they are at present.

Please refer to the [CBF Client Handbook](#) and the [OneClearstream Customer Handbook](#) for more detailed documentation on already existing processes in KADI and OneCAS respectively.

Instruction limits

For instructions with a high volume, CASCADE requires the splitting into multiple smaller instructions as a result of technical limitations.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	No impact
	For an instructed quantity greater than 10,000,000,000, the securities instruction for CASCADE is split in several instructions each inferior to 10,000,000,000.	For an instructed quantity greater than 10,000,000,000, the securities instruction for CASCADE is split in several instructions each inferior to 10,000,000,000.	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	No corresponding process	No corresponding process	

Instruction event identification

For electronic instructions on corporate action events, clients are required to include the necessary referencing in order for Clearstream to identify to corresponding event.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI Clients are required to fill the CORP ID to link to the corresponding MT564 Corporate Action Notification. Clients can optionally use the COAF. The COAF will be used by Clearstream to identify the related event if the CORP ID is filled with "NONREF". If there is conflicting information in COAF and CORP ID, then no straight-through-processing can be ensured.	OneCAS Clients are required to fill the CORP ID to link to the corresponding MT564 Corporate Action Notification. Clients can optionally use the COAF. The COAF will be used by Clearstream to identify the related event if the CORP ID is filled with "NONREF". If there is conflicting information in COAF and CORP ID, then no straight-through-processing can be ensured.	No impact
	Non-CBF-issued securities (except US, CH)	OneCAS Clients are required to use the CORP ID to link to the corresponding MT564 Corporate Action Notification. Clients cannot use the COAF.	

Voluntary events with interim line

Voluntary corporate action events generally include the option for the client to receive securities. Clearstream processes the corporate action event according to the choice of clients. For the German market, the Clearstream service offering includes the possible usage of CASCADE settlement functionality instead of a corporate action instruction via MT565 or corresponding Xact Web Portal functionality.

	As-Is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI Upon receipt of client instruction via MT565 and successful validation, Clearstream debits the parent line and credits an interim line. MT567 PACK message is sent when MT565 is validated and MT566 corporate action confirmation is created as soon as the instructed holding has been transferred from the parent line into the interim (tendered) line. Clients with CBF accounts may also instruct directly in Cascade to receive the tendered line and to participate in the event using KVEE/WE TR4 (settlement function). In this case, no corporate action reporting is provided to the client.	OneCAS Upon receipt of client instruction via MT565 and successful validation, Clearstream debits the parent line and credits an interim line. MT567 PACK message is sent when MT565 is validated and MT566 corporate action confirmation is created as soon as the instructed holding has been transferred from the parent line into the interim (tendered) line. Clients with CBF accounts may also instruct directly in Cascade to receive the tendered line and to participate in the event using KVEE/WE TR4 (settlement function). In this case, no corporate action reporting is provided to the client.	No impact
	Non-CBF-issued securities (except US, CH)	OneCAS Upon receipt of client instruction via MT565 and successful validation, Clearstream blocks the positions until the payment is completed. MT567 PACK message is sent when MT565 is validated and blocking has been processed. No interim line is created. The settlement function is not available to clients.	

Pending instructions

Upon the receipt of a client instruction, Clearstream performs a variety of validations and provides feedback to the client via MT567.

Clients will receive an MT567 Corporate Action Status and Processing Advice (PACK, PEND or REJT) for each corporate action instruction, including cancellation, sent via Swift MT565 or Xact Web Portal. This report indicates whether the instruction or cancellation is received by Clearstream, accepted for processing, rejected or denied. Each report contains the ISO 15022-compliant status code, reason codes and reason narrative.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	Clearstream will provide MT567 IPRC//PEND to clients only in specific cases
	<p>For a valid instruction, Clearstream provides MT567 IPRC//PACK.</p> <p>For an invalid instruction, Clearstream provides MT567 IPRC//REJT.</p> <p>In the event of ongoing (non-STP) investigation, Clearstream provides MT567 IPRC//PEND and PEND//NARR with a reason.</p>	<p>For a valid instruction, Clearstream provides MT567 IPRC//PACK.</p> <p>For an invalid instruction, Clearstream provides MT567 IPRC//REJT.</p> <p>Clearstream provides MT567 IPRC//PEND and PEND//NARR if the end of suspension period or the start of exercise period is in less than five days.</p>	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	<p>For a valid instruction, Clearstream provides MT567 IPRC//PACK.</p> <p>For an invalid instruction, Clearstream provides MT567 IPRC//REJT.</p> <p>Clearstream provides MT567 IPRC//PEND and PEND//NARR if the end of suspension period or the start of exercise period is in less than five days.</p>	<p>For a valid instruction, Clearstream provides MT567 IPRC//PACK.</p> <p>For an invalid instruction, Clearstream provides MT567 IPRC//REJT.</p> <p>Clearstream provides MT567 IPRC//PEND and PEND//NARR if the end of suspension period or the start of exercise period is in less than five days.</p>	

Voluntary events instructions handling

For voluntary events, Clearstream includes the related deadlines in the announcement. Clients should always send instructions prior to Clearstream deadline. Instructions are processed according to deadline priorities (when applicable). Instructions received from clients are validated by Clearstream and forwarded to the Lead Manager/Paying Agent in bulk mode on deadline date.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI MT565 instructions by clients are accepted until the Market deadline. Clients have two business days to move securities (settlement period) according to their instruction after the market deadline, if such service is offered by the agent. In the meantime, the instructions are acknowledged via MT567 with the status PEND. MT565 instructions received after the end of the Market deadline or after the settlement period, if applicable, will receive MT567 REJT. MT565 sent by clients after CBF deadline but before market deadline (for subscription offers / EXRI events) will receive status PEND and manual interaction by Clearstream is required. After this, status will be manually updated to PACK or REJT.	OneCAS MT565 instructions by clients are accepted until the Market deadline. Clients have two business days to move securities (settlement period) according to their instruction after the market deadline, if such service is offered by the agent. In the meantime, the instructions are acknowledged via MT567 with the status PEND. MT565 instructions received after the end of the Market deadline or after the settlement period, if applicable, will receive MT567 REJT. MT565 sent by clients after CBF deadline but before market deadline (for subscription offers / EXRI events) will receive status PEND and manual interaction by Clearstream is required. After this, status will be manually updated to PACK or REJT.	No impact
	Non-CBF-issued securities (except US, CH)	OneCAS MT565 instructions by clients are accepted until the Market deadline. For instructions where at the time of receipt no positions are available, Clearstream decides on the case-by-case basis on how to proceed. MT565 instructions received after the end of the Market deadline will receive MT567 REJT.	

Deductions

Holdings on sub-account -650 will not be subject for payment. Clients may choose to transfer positions to the sub-account in order to prevent them from participating in the corporate actions, for example, for legal reasons.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	<p>Clients may optionally use MT565 for deduction.</p> <p>The already existing processes for deductions remain in place.</p>
	<p>Clients have two possibilities to deduct positions from a corporate action event:</p> <ul style="list-style-type: none"> • The client directly transfers securities to the sub-account; • The client instructs Clearstream via MT599 to deduct the securities. 	<p>Clients have three possibilities to deduct positions from a corporate action event:</p> <ul style="list-style-type: none"> • The client directly transfers securities to the sub-account; • The client instructs Clearstream via MT565 to deduct holdings from the entitled position; • The client instructs Clearstream via MT599 to manually deduct the securities. 	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	<p>No deduction service is offered. Manual processing based on MT599 may apply.</p>	<p>No deduction service is offered. Manual processing based on MT599 may apply.</p>	

In order to ensure straight-through-processing, the MT565 needs to include the following data:

- CORP ID of the event has to be referenced in :20C::CORP.
- Deducted quantity has to be specified in :36B::QINS. The instructed deduction quantity cannot be larger than the entitlement quantity – if this is the case, the MT565 will be rejected.
- Dedicated narrative “NEW DEDUCTION INSTRUCTION” has to be included in field :70E::INST.
- In case of a cancellation of the deduction message, the narrative CANCEL OF DEDUCTION INSTRUCTION should be used.

Please note that in order to update an already submitted deduction, it is required to first cancel the existing deduction and then submit a new MT565 deduction request with the updated quantity.

Example:

:16R:GENL
:20C::CORP//AC12345678
:20C::SEME//1234567890
:23G:NEWM

:93B::ELIG//FAMT/1470000,
:93B::SETT//FAMT/1470000,
:16S:ACCTINFO
:16S:USECU
:16R:CAINST
:13A::CAON//001
:22H::CAOP//CASH
:35B:ISIN XS1379158550
:36B::QINS//FAMT/150000,
:70E::INST// NEW DEDUCTION INSTRUCTION
:16S:CAINST

Clearstream confirms the receipt of the MT565 by sending a MT567 Corporate Action Status and Processing Advice message.

Client may use standing deduction instructions, which are applicable for more than one corporate action event. For this, clients should contact Clearstream via MT599.

Instructions on sanctioned holdings

Client accounts may be subject to sanctions (for example, income deduction case, income freezing case and income pay out case) and therefore restricted from participating in corporate action events.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	Instructions on sanctioned holdings are not processed and according reporting is provided.
	Client instructions received for sanctioned holdings are processed manually. Clearstream sends a MT567 PEND with the wording "YOUR INSTRUCTION IS UNDER VALIDATION" in the narrative.	Client instructions received for sanctioned holdings or accounts are rejected and not processed. Clearstream sends a MT567 REJT with reason code NARR and the wording "Instruction on sanctioned account not accepted" in the narrative.	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	Instructions on sanctioned holdings are not processed and according reporting is provided.
	Client instructions received for sanctioned holdings are processed manually. Clearstream send a MT567 PACK/REJT upon acceptance or rejection, respectively, of the instruction.	Client instructions received for sanctioned holdings or accounts are rejected and not processed. Clearstream sends a MT567 REJT with reason code NARR and the wording "Instruction on sanctioned account not accepted" in the narrative.	

Instruction quantity type AMOR

The amortised value (AMOR) is the quantity expressed as an amount representing the current amortised face amount of a bond, for example, a periodic reduction/increase of a bond's principal amount.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	Clients will no longer be able to use the quantity type indicator AMOR.
	KADI allows and the usage of the quantity type indicator AMOR. Instructions with this indicator are processed manually as no STP is possible.	OneCAS does not allow the usage of quantity type indicator AMOR.	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	OneCAS does not allow the usage of quantity type indicator AMOR.	OneCAS does not allow the usage of quantity type indicator AMOR.	

3.6 Reversal and repayment

This chapter describes the changes for the processing of the reversal and repayment of corporate action events. Whenever not explicitly mentioned, current processing rules remain the same as they are at present. Please refer to the [CBF Client Handbook](#) and the [OneClearstream Client Handbook](#) for more detailed documentation on already existing processes in KADI and OneCAS respectively.

Reversal repayment announcement and reporting

A corporate action event might be subject to a reversal due to a change or an incorrect setup of the event details (for example, record date, ex-date) that affects the entitlement and payment processing.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	<p>For the client reporting of reversal for voluntary events, MT568 will be used instead of MT564.</p> <p>Generally, MT564 will use the qualifier ADDB REVR instead of CANC.</p>
	<p>A reversal (cancel and re-run) may occur when the corporate action event data (for example, date, price) is incorrect.</p> <p>Clients are informed via MT564 CANC for all corporate action event types.</p>	<p>A reversal may occur only when the corporate action event data (for example, date, price) is incorrect.</p> <p>For income events, clients are informed via MT564 ADDB REVR (CRA-reporting).</p> <p>For voluntary non-income events, clients are informed via MT568.</p> <p>For mandatory non-income events, clients are informed via MT564 ADDB REVR (CRA-reporting).</p>	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	<p>For the client reporting of reversal for mandatory non-income events, MT564 will be used instead of MT568, that is, the CRA-reporting will be enhanced¹.</p>
	<p>A reversal may occur only when the corporate action event data (for example, date, price) is incorrect or when the depository performs a reversal. Reversal repayment period

The reversal repayment period defines for how long in relation to the payment date the reversal of a corporate action can take place. In most cases, reversals are announced not too long after an event.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	No impact
	Reversal repayment can take place up to 280 days after the Payment Date without any impact on the standard reporting.	Reversal repayment can take place up to 280 days after the Payment Date without any impact on the standard reporting.	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	The reversal repayment period is extended to 280 days.
	Reversal repayment can take place up to 180 days after the Payment Date without any impact on the standard reporting.	Reversal repayment can take place up to 280 days after the Payment Date without any impact on the standard reporting.	

Cancel of Reversal repayment

An announced reversal request may be cancelled as long as it has not been executed.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	Clearstream will provide extended information in the cancellation message via narrative and reference fields.
	Reversals can be cancelled as long as they have not been executed. In this case, a MT564 ADDB message will be created and sent to clients and agents.	Reversals can be cancelled as long as they have not been executed. In this case, a MT564 ADDB message with specific reason code in narrative field :70E: and reference to the originally communicated reversal via field :20C: will be created and sent to clients and agents.	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	Clearstream will provide extended information in the cancellation message via narrative and reference fields.

Note: This functionality has been activated on OneCAS already on 20 March 2023. Meaning that for securities which are already today processed via OneCAS (that is, LMP securities), the described change is already active since 20 March 2023.

3.7 Transaction Management

This chapter describes the changes for the processing of corporate action events on flow. Whenever not explicitly mentioned, current transaction management rules with regard to instructions or affected events remain as they are at present. Please refer to the [CBF Client Handbook](#) and the [OneClearstream Client Handbook](#) for more detailed documentation on already existing processes in KADI and OneCAS respectively.

Reporting of transformations

A transformation occurs as a result of a reorganisation event where the ISIN or the nominal of a given security changes. Pending transactions are cancelled and replaced by new transactions with a changed ISIN or ratio or by PFoDs. The transformations lifecycle includes detection of the transformation, cancellation of underlying instructions and re-instruction, whenever applicable.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	In line with CAJWG standards, the corporate action reporting for transformations via MT564 and MT566 will no longer be available to clients.
	<p>Transformations are processed and reported in the following steps:</p> <ol style="list-style-type: none"> 1. MT564 REPE is generated on record date; 2. Cancellation of the original instruction via MT548; 3. New instruction in the resulting ISIN via MT54x (transformation in security) or credit of cash via PFoD on DCA for EUR or 6-series account for non-EUR, respectively (transformation in cash); 4. Settlement of the proceeds and settlement confirmation via MT544-7; 5. Reporting of the final settlement of the corporate action proceeds via MT566. 	<p>Transformations are processed and reported in the following steps:</p> <ol style="list-style-type: none"> 1. Cancellation of the original instruction via MT548; 2. New instruction in the resulting ISIN via MT54x (transformation in security) or credit of cash via PFoD on DCA for EUR or 6-series account for non-EUR, respectively (transformation in cash); 3. 	As-is process	Future process	CBF client impact
		3. Settlement of the proceeds and settlement confirmation via MT544-7.	

Reference to underlying trade for transformations

In the reporting for transformations into securities and into cash, a reference to the underlying trade is included.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	Clients will receive the same settlement transaction indicator as in the underlying instruction.
	The MT548 includes the settlement transaction indicator SETR//TRAD.	The MT548 includes the same settlement transaction indicator as in the underlying instruction (for example, SETR//TRAD or SETR//CLAI) and the settlement transaction condition indicator STCO//TRAN.	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	Clients will receive the same settlement transaction indicator as in the underlying instruction.
	The MT548 includes the settlement transaction indicator SETR//CORP and the settlement transaction condition indicator STCO//TRAN.	The MT548 includes the same settlement transaction indicator as in the underlying instruction (for example, SETR//TRAD or SETR//CLAI) and the settlement transaction condition indicator STCO//TRAN.	

Market claims and reverse market claims

Market claims and reverse market claims are the processes to reallocate the proceeds of a distribution to the contractually entitled party. A claim can occur for income and non-income distribution events. The lifecycle includes detection of market claim or reverse market claim and compensation of the claim via additional settlement instructions, whenever applicable.

Market claims are processed if a security is traded "cum" (with coupon) but settled after the entitlement date. This process is applied for OTC and stock exchange trades.

Reverse market claims are processed if the trade date is on or after the ex-date and the settlement date is on or before the record date. This process is applied for OTC trades, stock exchange trades and CCP trades.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI Market claims and reverse market claims are processed and reported in the following steps: <ol style="list-style-type: none"> 1. A MT564 REPE is generated as soon as a market claim or reverse market claim has been detected; 2. A settlement instruction (FoP for securities, PFoD for cash) is generated as soon as the underlying instruction is settled and a market claim or reverse market claim has been detected; 3. Settlement of the market claim or reverse market claim and settlement confirmation via MT544-7; 4. Reporting of the final settlement of the corporate action proceeds via MT566. 	OneCAS Market claims and reverse market claims are processed and reported in the following steps: <ol style="list-style-type: none"> 1. A MT564 ADDB is generated as soon as a market claim or reverse market claim has been detected; 2. A settlement instruction (FoP for securities, PFoD for cash) is generated as soon as the underlying instruction is settled and a market claim or reverse market claim has been detected; 3. Settlement of the market claim or reverse market claim and settlement confirmation via MT544-7; 4. Reporting of the final settlement of the corporate action proceeds via MT566. 	The MT564 reporting is changed to the OneCAS format (see Chapter 4).
	OneCAS Market claims and reverse market claims are processed and reported in the following steps: <ol style="list-style-type: none"> 1. A MT564 is generated as soon as a market claim or reverse market claim has been detected; 2. A settlement instruction (PFoD) is generated as soon as the underlying instruction is settled and a market claim or reverse market claim has been detected; 	OneCAS Market claims and reverse market claims are processed and reported in the following steps: <ol style="list-style-type: none"> 1. A MT564 is generated as soon as a market claim or reverse market claim has been detected; 2. A settlement instruction (PFoD) is generated as soon as the underlying instruction is settled and a market claim or reverse market claim has been detected;

	As-is process	Future process	CBF client impact
	3. Settlement of the market claim or reverse market claim and settlement confirmation via MT544-7; 4. Reporting of the final settlement of the corporate action proceeds via MT566.	3. Settlement of the market claim or reverse market claim and settlement confirmation via MT544-7; 4. Reporting of the final settlement of the corporate action proceeds via MT566.	

Market claims and reverse market claims detection

The lifecycle of market claims and reverse market claims begins with the detection of pending transactions in securities with income and non-income distribution events, whenever applicable. Compensation instructions are created based on the market claim rules.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	No impact
	For CCP transactions, the compensation instruction is created when detection rules are fulfilled and the underlying instruction is matched at the end of the entitlement date. For all other transactions (for example, OTC or SE), the compensation instruction is created when detection rules are fulfilled and the underlying instruction is settled from the payment date.	For CCP transactions, the compensation instruction is created when detection rules are fulfilled and the underlying instruction is matched at the end of the entitlement date. For all other transactions (for example, OTC or SE), the compensation instruction is created when detection rules are fulfilled and the underlying instruction is settled from the payment date.	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	The compensation instruction is created when detection rules are fulfilled and the underlying instruction is matched at the end of the entitlement date.	The compensation instruction is created when detection rules are fulfilled and the underlying instruction is matched at the end of the entitlement date.	

Please note that for CBL and LuxCSD clients processing market claim and reverse market claim events for DE securities, the detection rules are changed so that for non-CCP instructions, only settled underlying instructions are considered for the creation of market claims and reverse market claims .

Opt-out indicator

Clients can specify in their settlement instructions if they want their trades to be excluded from the generic market claims and reverse market claims detection of CBF. This can be done via the opt-out indicator (:22F::STCO//NOMC).

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	No impact
	If the opt-out indicator is set, then no market claims are created. For reverse market claims, the opt-out indicator is not considered and compensation instructions are created.	If the opt-out indicator is set, then no market claims are created. For reverse market claims, the opt-out indicator is not considered and compensation instructions are created.	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	If the opt-out indicator is set, then no market claims or reverse market claims are created.	If the opt-out indicator is set, then no market claims or reverse market claims are created.	

Internal instructions (AA01 P)

An internal instruction with instruction type AA01 P is generated, when a client requests an account transfer of registered shares within the same CBF account. That is, buyer (LAST-KTO 1234000) and seller (GUT-KTO 1234000) of the internal instruction are the same. Hence these types of instruction are not sent to T2S.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	Market claims and transformations are no longer created for internal instructions (AA01 P).
	Internal instructions, including instruction type AA01 P, and instructions sent to T2S are considered for the generation of market claims and transformations.	Only instructions sent to T2S are considered for the generation of market claims and transformations. Internal instructions, including instruction type AA01 P, are not considered for the generation of market claims and transformations.	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	Only instructions sent to T2S are considered for the generation of market claims and transformations. Internal instructions, including instruction type AA01 P, are not considered for the generation of market claims and transformations.	Only instructions sent to T2S are considered for the generation of market claims and transformations. Internal instructions, including instruction type AA01 P, are not considered for the generation of market claims and transformations.	

Buyer Protection Deadline

Buyer protection (BP) is a process whereby a buyer who has yet to receive the underlying securities of an elective corporate action instructs the seller in order to receive the proceeds of his choice. The objective of buyer protection is to ensure that the buyer in a pending transaction, who has acquired the right to elect in an (elective) reorganisation, will be able to express his preferred option, and thus receive the proceeds of his choice.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	The Buyer Protection Deadline will be created and added to the MT564.
	No Buyer Protection Deadline is reported in the MT564.	The Buyer Protection Deadline (ECPD and GUPA) will be created by Clearstream and added in the MT564 messages generated by OneCAS for the German market. <ul style="list-style-type: none"> • ECPD: final settlement date / T2S business date before market deadline; • GUPA: last trading date / one settlement cycle before ECPD. 	
Non-CBF-issued securities (except US, CH)			No impact
	Both Buyer Protection deadline dates (ECPD - Election to Counterparty Market Deadline and GUPA - Guaranteed Participation Date/Time) are included in the MT564 message, whenever local market partners provide this feedback.	Both Buyer Protection deadline dates (ECPD - Election to Counterparty Market Deadline and GUPA - Guaranteed Participation Date/Time) are included in the MT564 message, whenever local market partners provide this feedback.	

3.8 Tax management

Tax breakdown

With introduction of the InvStG 2018, taxation of dividends and similar income payments from investments in German equities, participation rights and convertible bonds held by foreign investment funds significantly changed. Under the new act, if the foreign investment fund obtains and provides tax status certificate including, the German withholding tax is reduced from the full tax rate of 26,375% to 15% (incl. 5,5% solidarity surcharge).

CBF clients can provide a tax reconciliation breakdown after payment for an account with a standing instruction to disclose the final beneficial owner behind the account within 30 days after entitlement.

Please refer to [Announcement D22075](#) for more details to the process.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	CBF clients will need to use different channels in order to provide tax breakdown.
	<p>CBF clients request the tax breakdown via a CSV file upload through the BO Upload application available on the Clearstream website.</p> <p>After validation, BO-Upload application either rejects the file or informs the client by a generated email.</p> <p>CBF clients may create a standing instruction by providing the certificate "Auftrag zur Abrechnung von Erträgen mit dem ermäßigten Kapitalertragsteuersatz i.S.d. § 7 Abs. 1 InvStG".</p>	<p>CBF clients request the tax breakdown via three different channels:</p> <ul style="list-style-type: none"> • Swift MT565 message; • Xact Web Portal corporate action screen; • Xact Web Portal file upload functionality. <p>Clearstream will provide feedback on the tax breakdown instructions via MT567 or Xact Web Portal equivalent.</p> <p>CBF clients may create a standing instruction by providing the certificate "Auftrag zur Abrechnung von Erträgen mit dem ermäßigten Kapitalertragsteuersatz i.S.d. § 7 Abs. 1 InvStG".</p>	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	Not considered for this document.	Not considered for this document.	

Xact Web Portal functionalities have been extended in order to process tax breakdowns. On the corporate action instruction screen, new (optional) fields on the beneficial owner details have been added. For the corporate action instruction file upload functionality, the template that users can download, fill out and then upload in order to enter corporate action instructions has been updated to include beneficial owner information. Field descriptions, character limitations and optional/mandatory indicator for the template are included as table in the appendix.

Mapping of KADI fields to Swift MT565 fields:

Field as-is	Description	Field to-be (Swift)

or

Tax voucher

From 2012, a tax voucher is required for a tax reclaim with the Federal Central Tax Office. This means, that each CBF client eligible for the benefits of a Double Taxation Treaty (DTT) needs a German tax voucher when reclaiming taxes on income from German securities. CBF creates tax vouchers only upon the request of the client.

CBF may only issue tax vouchers if there is sufficient existing "tax contingent" per event for the client. The contingent is the sum of settled positions on entitlement date plus all market claims, sales and purchases compensated by Clearstream Banking in the market claim period.

The CBF client can file an application for a single tax voucher [Einzelsteuerbescheinigung] with respect either to their own assets or to those of their client.

Furthermore, CBF provides for an accumulative tax voucher [Sammelsteuerbescheinigung] used in the context of the refund, by the domestic credit institution and ultimate custodian, of withholding tax that has been retained twice (if given).

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	
	<p>Clients request the tax voucher via a CSV file upload through the BO Upload application available on the Clearstream website.</p> <p>The client must provide within the CSV file the below data:</p> <ul style="list-style-type: none"> • ISIN; • Ex-Date; • Account Master (4 digits); • Nominal per fund; • Name; • Address; • Fund Reference; • Tax (KESt) Rate; • Kind of Tax Voucher; • Name of second foreign depository bank; • Address of second foreign depository bank; • Date of request. <p>The finalised tax voucher is printed and provided to clients via mail.</p> <p>Clearstream will store tax vouchers for ten years after creation.</p>	<p>Clients request the tax voucher either via Xact Portal or via CreationDirect.</p> <p>The client must provide within the request the below data:</p> <ul style="list-style-type: none"> • ISIN; • Ex-Date; • Account: <ul style="list-style-type: none"> • CBF account (7 digits); • CBL account (5 digits); • LuxCSD account (5 digits); • Nominal per fund; • Name; • Address; • Fund Reference; • Tax (KESt) Rate; • Kind of Tax Voucher; • Name of second foreign depository bank; • Address of second foreign depository bank; • Date of request. <p>The finalised tax voucher is provided to clients via Xact Web Portal or CreationDirect. Xact Web Portal offers download and print functionality.</p>	<p>Clients will need to use different channels in order to request tax vouchers.</p> <p>The required data is changed to include the account number instead of the account master.</p> <p>The tax voucher is no longer provided to clients via mail but is instead available for download and printing.</p>

	As-is process	Future process	CBF client impact
		Clients will have access to stored tax vouchers for ten years after creation.	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	Not considered for this document.	Not considered for this document.	

Please note that for corporate action events that are processed in KADI, tax vouchers have to be requested via the current process. The future process can only be used for events processed in OneCAS.

Process description:

	Xact Web Portal	CreationDirect (Xact File Transfer)
Tax voucher request	Clients have to use the template to generate a csv file. This file can then be uploaded on the dedicated tax voucher screen.	Clients have to use the template to generate a csv file. This file can then be uploaded in CreationDirect.
Tax voucher request cancellation	Existing tax vouchers can be cancelled via the Xact Web Portal Tax voucher list view as well as the voucher's respective detailed view. The tax contingent is automatically adapted after cancellation.	Existing tax vouchers can be cancelled via upload of the csv generated out of the template's "Download&Cancellation Requests" tab. The tax contingent is automatically adapted after cancellation.
Tax voucher download/ reprint	Client can download the finalised tax vouchers via the Xact Web Portal Tax voucher detailed view. No archiving of tax vouchers.	Clients can download the finalised tax vouchers received via CreationDirect. Already archived tax vouchers can be reprinted (i. e. made available for download again) via upload of the csv generated out of the template's "Download&Cancellation Requests" tab.
Tax voucher status	Clients can use Xact Web Portal functionality to search for specific tax voucher (for instance, by searching for the unique tax voucher ID) and see the current processing status	Clients receive feedback on the tax voucher processing status via status reports in CreationDirect.

Field descriptions, character limitations and optional/mandatory indicator for the template in Xact Web Portal/ CreationDirect are included as table in the appendix. The corporate action event related to the entry on the tax voucher request can be identified with certainty by providing either the corporate action reference or the ISIN in combination with event type and record date / payment date. If less data is provided (e. g. only ISIN) this may in some cases suffice to identify the related corporate action event. If not, the tax voucher request is rejected as more information is required to identify the correct event.

Tax adjustment instruction market claim reporting

Tax adjustment instructions are used for the debiting or crediting of taxable amounts as part of the market claim processing.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	No impact
	One bulk tax adjustment instruction for the recrediting of tax payments is created at the end of every day (starting on entitlement date and running on a daily basis until the end of the market claim period). The report KD184 explains the different daily market claim tax adjustment instructions.	One bulk tax adjustment instruction for the recrediting of tax payments is created at the end of every day (starting on entitlement date and running on a daily basis until the end of the market claim period). A corresponding report to explain the different daily market claim tax adjustment instructions is provided.	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	Tax adjustment instructions for the recrediting of tax payments are created for every event.	Tax adjustment instructions for the recrediting of tax payments are created for every event.	

Please note that for CBL and LuxCSD clients processing DE [securities](#), the recrediting is changed to be done in one bulk instruction at the end of the day.

3.9 Main Paying Agent Reporting

Today, in KADI, Main Paying Agents/Lead Managers (“Zahlstellen”) use Swift messages, the CASCADE Online screens (KVG1) or dedicated KADI-Reports (for instance, KD112) to retrieve information about corporate action events and the corresponding payments. With the migration of corporate action processing to OneCAS, CASCADE Online Screens and KADI-Reports are no longer supported for the migrated events and securities. Instead, an alternative automated processing solution is available. Swift reporting remains available, but requires a new subscription within Xact Web Portal.

Corporate action reporting via Swift

Clearstream will send MT564 notifications and MT566 payment confirmations to the Main Paying Agents/Lead Managers as follows:

- MT564 for Main Paying Agents will provide a reference to the Main Paying Agent “ADVICE FOR PAYING AGENT” in field 70E::ADTX of the MT564 sequence F (ADDINFO).
- MT566 for Main Paying Agents will provide a reference to the Main Paying Agent “CONFIRMATION FOR PAYING AGENT” in field 70E::ADTX of the MT566 sequence E (ADDINFO), along with T2S actor reference and ref-owner BIC.
- MT564 for Lead Managers will provide a reference to the Lead Manager “ADVICE FOR LEAD MANAGER” in field 70E::ADTX of the MT564 sequence F (ADDINFO).
- MT566 for Lead Managers will provide a reference to the Lead Manager “CONFIRMATION FOR LEAD MANAGER” in field 70E::ADTX of the MT566 sequence E (ADDINFO), along with T2S actor reference and ref-owner BIC.

Report frequency is real-time.

Subscription

Main Paying Agents/Lead Managers using MT564 and/or MT566 Swift messages need to be aware that existing reporting subscriptions out of KADI will not be migrated by Clearstream, independent of reporting channel (Swift, MQ, FileTransfer). The reporting options “MT564 for Paying Agents” and “MT566 for Paying Agents” have been created within Xact Web Portal (please see screenshot below) and apply for Lead Manager reporting as well as for Main Paying Agent reporting. That is, Main Paying Agents/Lead Managers that want to use Swift messages need to create a new subscription within Xact Web Portal in advance of the migration weekend.

Report subscription for MT564 and MT566 has to be set up by Main Paying Agents/Lead Managers via Xact Web Portal. The available reporting channels are Swift, MQ and Xact (for download). Please note that the subscription is available in the production environment as of 03 April 2023. Please use the subscription start date 30/06/2023 in order to ensure that messages will be generated during the migration weekend.

The screenshot shows the 'New report subscription' form in the Xact Web Portal. The form is titled 'Create' and has a 'Query / List' button. The 'Report type' dropdown is open, showing a list of options including 'MT564 for Paying Agents' and 'MT566 for Paying Agents'. The form also includes fields for 'Account operator' (CBF-T25), 'Business service' (Asset Servicing), 'Ownership' (Xact), 'Financial institution', and 'Mailing address' (Please select...). The form has 'Start', '1', '2', and 'End' tabs, and 'Cancel' and 'Next' buttons at the bottom right.

Figure 2: Main Paying Agents/Lead Managers reporting subscription in Xact Web Portal

Please also refer to the [video guides](#) or the [User Manual](#) for details on how to set up reporting subscriptions. In case of uncertainties, please contact the Clearstream Connectivity-Team for support via phone (+49 (0) 69 / 211 11590) or email (connect@clearstream.com).

Important aspect to consider for the subscription: KADI subscriptions are on account master level (Kontostamm / 4-digit number), automatically covering all accounts below the account master (for instance, xxxx000, xxxx001 etc.). Xact Web Portal subscriptions are on 7-digit subaccount level. Clients should verify that all sub-accounts are covered in the new Xact Web Portal subscription.

Narrative

In case of deductions, the related deduction quantity and/or amount is presented in the narrative (:70E::ADTX) as no standardised field exists in the MT56x message. The narrative is generated according to the following logic:

Row 1: DEDUCTED QTY + space + sum of deducted nominal

Row 2: NOT DELIVERED + space + CCY AMNT / ISIN XXXXXXXXXXXX QTY xxxxx

Row 2 is generated according to the movements of the event. In case of multiple movements, e. g. both cash and security movement, row 2 is repeated accordingly.

Example (dividend payment, i. e. only one cash movement):

```
:70E::ADTX//DEDUCTED QTY 20000  
NOT DELIVERED EUR AMNT 19800
```

Within the standardised fields of the Swift message, the computed nominal and amount (including deductions) are listed in :93B::ELIG (MT564) or :93B::CONB (MT566) as well as within the fields of the movements (CASHMOVE/SECMOVE).

Corporate action reporting via alternative solutions

In the current environment, online functionalities (for instance, CASCADE screen KVG1 UE) and specific reports (for instance, KD112 and KD211) are available in addition to the Swift reporting.

These functionalities will no longer be available for migrated securities and events. Please note that Xact Web Portal does not offer an online view for the Lead Manager and Main Paying Agent perspective.

As an alternative, Clearstream will offer a reporting solution within Xact Web Portal to retrieve the information. That is, the new "Main Paying Agent / Lead Manager report" will be available as of implementation date.

The report will be available in XLSX format for download and is created on a daily basis with corporate action events that have their payment date within the last as well as within the next five business days. For every event, the key information (such as ISIN, Swift event type, credit and debit payment amounts, nominal, payment date etc.) is reported. Additionally, a summary of payments per payment date is given. In order to receive this report, Main Paying Agents/Lead Managers will have to create a subscription in Xact Web Portal which may require user access to the Asset Servicing Module in Xact Web Portal. Please contact your Xact Web Portal administrator, if available, or the Clearstream Connectivity Team via connect@clearstream.com to set this up. Please note that the subscription is available in the production environment.

Please find below a description of the columns in the "Details" tab of the file. A preliminary example file is available on the [OneClearstream rollout documentation](#) webpage together with this document.

Note: With the November release 2023, the Main Paying Agent/Lead Manager report have been enhanced in the following way:

- **Timeframe:** The selection of events to be reported is enlarged to contain also events with payment date up to 20 business days into the future
- **Reversal tab:** In case a payment is reversed or repayed at a later time, it will be reported in a dedicated "REVERSAL/REPAY dd.mm"-tab. The tab will exist for and include all all reversals or repayments with booking (T2S) business date equal to the previous business day. The tab is structured similarly to the "Detail" tab, however with a preceding column called "REVR/REPAY" which will contain either the value "REVR" to identify a reversal or "REPAY" to identify a repayment. The reversal or repayment is selected only once for the report. Once the reversal has been reported, the original payment is no longer featured on the next reports.
- **Hold tab:** In case a payment is on hold, it will be reported in a dedicated "On hold"-tab. Payments on hold are not considered in the "Detail"-tab or the respective PAYD tabs. The tab is structured similarly to the "Detail" tab, however with a preceding column called "Hold Reason" which will contain a narrative to explain the respective reason for the hold (for instance, "Blocked by MPA" or "Event put on hold by CBF").

Column	Name	Description	Formatting
A1	REVR/REPAY	Only in case of "REVERSAL/REPAY"-tab. Identifier for reversal or repayment	"REVR" or "REPAY"
A2	Hold Reason	Only in case of "On hold"-tab. Narrative reason why the payment is on hold.	Narrative (alphanumeric)
A	Security Account	Security account of the MPA	7-digit account
B	Payment Date	Payment date of the event	YYYY-MM-DD
C	ISIN	ISIN of the event	12 characters

Column	Name	Description	Formating
D	Payment Amount - Credit	Payment amount that is credited to the clients based on holdings on the security account (client view)	Numeric
E	CCY	Currency of above payment amount	3-digit currency code
F	Payment Amount - Debit	Payment amount that is debited from the Main Paying Agent based on all eligible holdings of the event (MPA view)	Numeric
G	CCY	Currency of above payment amount	3-digit currency code
H	Payment Amount - Net	Credit subtracted by debit (combined view)	Numeric
I	CCY	Currency of above payment amount	3-digit currency code
J	Event Type	Type of the event	4-character ISO event code (for example, DVCA)
K	CORP ID	CORP ID of the event	See section 3.1 for CORP ID logic
L	Cash Account	Related cash account on which payments will be booked	Alphanumeric
M	Record Date	Record date of the event	YYYY-MM-DD
N	Ex Date	Ex date of the event	YYYY-MM-DD
O	Value Date	Value date of the payment	YYYY-MM-DD
P	Nominal	Eligible balance of the event (MPA view)	Numeric with prefix "N" when the nominal is negative
Q	Nominal Type	Type of above nominal	FAMT, UNIT, AMOR
R	Interest Rate	Interest rate of the event	Percentage or actual amount
S	CCY	Currency of above amount (if applicable)	If the interest rate is an actual amount, 3-digit currency code. If the interest rate is a percentage, this field is empty.
T	Dividend Amount	Dividend rate of the event	Percentage or actual amount
U	CCY	Currency of above amount (if applicable)	If the dividend rate is an actual amount, 3-digit currency code. If the dividend rate is a percentage, this field is empty.
V	Redemption Amount	Redemption amount of the event	Percentage, actual amount or index rate
W	Amount Type	Amount Type of the redemeption	If the redemption amount is an actual amount, 3-digit currency code.

Column	Name	Description	Formating
			If the redemption amount is a percentage, PRCT. If the redemption amount is an index rate, INDEX.
X	Pool Factor	Pool factor of the event	Numeric
Y	Nominal - Holdings	Settled holdings on the security account (client view)	Numeric
Z	Type	Type of above nominal	FAMT, UNIT, AMOR
AA	Nominal - SE market claim	Eligible market claims as a result of pending stock exchange trades on the security account (client view)	Numeric
AB	Type	Type of above nominal	FAMT, UNIT, AMOR
AC	Nominal - OTC market claim	Eligible market claims as a result of pending OTC trades on the security account (client view)	Numeric
AD	Type	Type of above nominal	FAMT, UNIT, AMOR
AE	Nominal - CCP market claim	Eligible market claims as a result of pending CCP trades on the security account (client view)	Numeric
AF	Type	Type of above nominal	FAMT, UNIT, AMOR
AG	Secmove Block Count	Identifying number of the security movement (SECMOVE)	1, 2, 3, 4 or 5
AH	Debit/Credit	Direction of the security movement (SECMOVE)	CRED or DEBT
AI	SecMove ISIN	ISIN of the security movement (SECMOVE)	12 characters
AJ	SecMove Payment Date	Payment date of the security movement (SECMOVE)	YYYY-MM-DD
AK	SecMove Quantity	Quantity of the security movement (SECMOVE)	Numeric
AL	SecMove Quantity Type	Type of above nominal	FAMT, UNIT, AMOR
AM	Ratio Type	Rate of the security movement (SECMOVE)	NEWO (new to old) or ADEX (additional for existing)
AN	Qty new	Further defines the rate of the security movement – new rate	Numeric
A0	Qty old	Further defines the rate of the security movement – old rate	Numeric

Column	Name	Description	Formatting
In the case of further security movements, the SECMOVE block (AG – AO) will be repeated in the next columns. In this case, the block count will advance. A second SECMOVE will then be shown in columns AP to AX, a third in AY to BG etc.			

Settlement reporting (incl. PFoDs)

At present, MT54x and MT536 messages (including PFoDs) that are created to debit the payment/securities from Main Paying Agents/Lead Managers and MT536 messages have KADI specific keys such as “301”, “401” or “501” in the field :20C::COMM//, which correspond to the Buchungstext-Geld. This allows clients to identify the messages as information for Main Paying Agents/Lead Managers.

With the KADI DE Migration to OneCAS, this qualifier will no longer be included in the MT54x and MT536 messages for migrated events and securities.

In the OneCAS reporting, clients can use the following wording in the narrative to identify settlement messages for Main Paying Agents/Lead Managers:

Situation		Event type (example)	Text in :70E:
View of the paying agent	View of the client		
Debit of cash	Credit of cash	Interest payment (INTR MAND)	xxxxCRED DE0001234560 ABC CASH DISTRIBUTION QTY 100
Debit of securities	Credit of securities	Exercise of warrant (EXWA MAND)	xxxxCRED DE0001234560 ABC SEC DISTRIBUTION QTY 100
Credit of cash	Debit of cash	Exercise of rights (EXRI MAND)	xxxxDEBT DE0001234560 ABC CASH COLLECTION QTY 100
Credit of securities	Debit of securities	Exchange offer (EXOF MAND)	xxxxDEBT DE0001234560 ABC SEC COLLECTION QTY 100

Generally, the narrative is constructed according to the following logic:

Row 1: ISO CAEV + CRED/DEBT + *space* + ISIN

Row 2: Clearstream market team (3 characters) + *space* + “SEC/CASH COLLECTION/DISTRIBUTION” + *space* + empty/“REVERSAL”/“LATEPAYMNT”/“MPACHANGE” (according to situation) + “QTY” + *space* + nominal

The wording “SEC/CASH COLLECTION/DISTRIBUTION” is exclusively used for messages to Main Paying Agents/Lead Managers.

In case of reversal and repayment processes (corresponds to former usage of, for instance, codes “303” or “305”) the narrative is extended by an additional word (REVERSAL, LATEPAYMNT or MPACHANGE) to identify this situation.

Situation	Example dividend payment (cash debit from the Main Paying Agent)	Example exercise of rights (cash credit for the Main Paying Agent)
Payment	DVCACRED DE0001234560 OCA CASH DISTRIBUTION QTY 100	EXRIDEBT DE0001234560 OCA CASH COLLECTION QTY 100
Reversal	DVCACRED DE0001234560 OCA CASH DISTRIBUTION REVERSAL QTY 100	EXRIDEBT DE0001234560 OCA CASH COLLECTION REVERSAL QTY 100
Repayment	DVCACRED DE0001234560 OCA CASH DISTRIBUTION LATEPAYMNT QTY 100	EXRIDEBT DE0001234560 OCA CASH COLLECTION LATEPAYMNT QTY 100
MPA change	DVCACRED DE0001234560 OCA CASH DISTRIBUTION MPACHANGE QTY 100	EXRIDEBT DE0001234560 OCA CASH COLLECTION MPACHANGE QTY 100

Commissions (Zahlstellenprovision)

The existing service of Clearstream paying out commissions on behalf of the paying agent, which was mainly used for physical securities in the past, will be decommissioned. Paying agents may continue to pay commissions to clients without Clearstream’s involvement.

Investment funds (Phase 2) changes

<u>CBF-issued investment funds</u>	<u>KADI</u>	<u>OneCAS</u>	<u>Issuer agents need to adapt to new process.</u>
	<p><u>Whenever a corporate action with a (SECU) ratio ends with fractions:</u></p> <ul style="list-style-type: none"> • <u>CBF will increase the number of decimals on the new ISIN during the event exercise period.</u> • <u>It is followed by a pure manual process between Clearstream and Agent banks to compensate the fractions and re-affect the original decimals number to the new ISIN.</u> • <u>Cash compensations to the clients are paid only after issuer agents provide the cash. This can take place anytime from the payment date up to six months following the payment date.</u> 	<p><u>Whenever a corporate action with a (SECU) ratio ends with fractions:</u></p> <ul style="list-style-type: none"> • <u>Agent bank will be debited by the number of securities to be distributed and debited by the amount of cash in lieu for fraction cash compensation.</u> • <u>Issuance of the new ISIN still based on the rounding (old ISIN issuance positions * ratio) will remain the same.</u> <p><u>The email to the Agent contains the following information:</u></p> <ul style="list-style-type: none"> • <u>Issuance of the new ISIN being rounding (old ISIN issuance positions * ratio);</u> • <u>Number of securities being distributed by CBF, being sum of new ISIN across all entitled accounts;</u> • <u>Quantity for the cash compensation;</u> 	

		<ul style="list-style-type: none"> • <u>Cash compensation if fraction price is known.</u> <p><u>The IPAR and Agent reports include the effective security debit quantity being the sum of the new ISIN distributed to the client. This means that the SECU DEBT Qty will not correspond to the total quantity rounding (entitlement * ratio).</u></p> <p><u>Agent banks are requested to provide the price before the Record date. If the price is not mentioned in the announcements before Record date and only provided later, Clearstream will make fractional cash payments to the clients later.</u></p> <p><u>Agent bank accounts will be debited (new ISIN) immediately on payment date as soon as there are enough holdings available in the account. If holdings are insufficient, instructions will remain pending.</u></p> <p><u>Example:</u></p> <p><u>If there are 1200 on issuance account (as entitlement) and ratio is 10:1:</u></p> <ul style="list-style-type: none"> • <u>1200 * 1/10 : 120 new ISIN to be debited from agent account but with the fraction on the client account, Clearstream might debit 112.</u> • <u>Hence, in the agents account for entitled quantity 1200, a quantity of 112 new ISIN will be debited.</u> • <u>8 shares remain on the agent account to be sold in the market to provide cash to Clearstream.</u> • <u>Fractions cash compensation will be done by Clearstream.</u> 	
--	--	--	--

<u>CBF-issued investment funds</u>	<u>KADI</u>	<u>OneCAS</u>	
	<ul style="list-style-type: none"> • <u>Quantity of absorbing funds to be created (markup performed by the issuing agent) is taken / extracted by KADI after 18:00 on Record date. → Entitled quantity of absorbed funds * ratio.</u> • <u>KADI run is manually put on hold (until confirmation is received that issuer agent has performed the markup of the correct quantity of the absorbing funds.</u> • <u>On execution date (in the morning) and based on information extracted from KADI (file), New Issues (NI) team sends a request (by email) to the issuing agent confirming the quantity of the absorbing funds to be created.</u> • <u>Issuer performs the markup of the absorbing funds on the issuing a/c and sends confirmation and authorisation of debit to NI team.</u> • <u>Once the markup of absorbing funds is confirmed (and verified by NI), CA Ops manually release the KADI run and trigger the payment to CBF participants (against CBF internal account).</u> • <u>Currently, issuer agents process the markup on their side, with the target to provide the new funds in their account by payment date.</u> 	<p><u>On Record date EOD:</u></p> <ul style="list-style-type: none"> • <u>1CAS computes the quantity of absorbing funds to be created (markup performed by the issuing agent).</u> • <u>1CAS automatically sends a request (by email) to the issuing agent confirming the quantity of the absorbing funds to be credited on the issuer agent account (markup).</u> • <u>Clearstream will communicate to the issuer agent:</u> <ul style="list-style-type: none"> ○ <u>Total quantity of funds to be created (markup) based on the ratio and the total balance on issuance agent and in case of roundings/ fractional shares;</u> ○ <u>Total of absorbing funds to be distributed to Clearstream clients;</u> ○ <u>Quantity to be compensated in cash (number of fractional shares at CB participant account level). This notification to agent bank will be done by New Issues Frankfurt based on received 1CAS email.</u> <p><u>In the new process, Clearstream proposes to take over the markup process: Clearstream will process the markup of the global note and issuer agents are no longer required to do this step. Thus, dependencies between Clearstream and the issuer agents, was well as the potential for delays is eliminated. Agent bank accounts will be debited (new ISIN) immediately on payment date as soon as there are enough holdings available in the account. If holdings are insufficient, instructions will remain pending.</u></p>	<p><u>Issuer agents need to adapt to new process.</u></p>

4. Functional Specifications – Connectivity and Reporting

This chapter provides information regarding the future connectivity and reporting setup in the OneClearstream system. The focus of this document is on the changes resulting [from](#) the KADI DE Migration [Phase 1](#) (started on 1 July 2023 and currently ongoing) and Phase 2 (scheduled for 1 July 2024). That is, current processes and future changes for German investment funds or CH/[US](#) securities are not in scope of this chapter.

With the go-live of the KADI DE Migration [Phase 2](#) to OneCAS on [1 July 2024](#), the reporting of corporate actions for CBF-issued [investment funds and remaining Phase 1](#) securities will be offered via OneCAS.

Please note that this document does not describe each (sub)process in detail. The document describes only as much detail as required to explain the functional logic and sequence of the processes. Please refer to the [Clearstream Connectivity Handbook](#) or the [Xact via Swift User Guide](#) for more detailed documentation on already existing reporting in KADI and OneCAS respectively.

Connectivity options (A2A)

Clearstream offers multiple different A2A connectivity tools to receive corporate actions reporting and to send instructions.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	Xact File Transfer instead of CBF File Transfer
	The following A2A connectivity tools are offered to clients: <ul style="list-style-type: none"> • Swift; • MQ; • CBF File Transfer. 	The following A2A connectivity tools are offered to clients: <ul style="list-style-type: none"> • Swift; • MQ; • Xact File Transfer. 	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	The following A2A connectivity tools are offered to clients: <ul style="list-style-type: none"> • Swift; • MQ; • Xact File Transfer. 	The following A2A connectivity tools are offered to clients: <ul style="list-style-type: none"> • Swift; • MQ; • Xact File Transfer. 	

Connectivity options (U2A)

Clearstream provides information regarding corporate action events not only via MT564, but also via user front-end (U2A).

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	Information will no longer be provided via CASCADE PC, clients need to use Xact Web Portal. The information provided for an event may differ.
	Information regarding corporate action events is provided via dedicated screens (KVG1) in CASCADE PC.	Information regarding corporate action events is provided via Xact Web Portal.	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	Information regarding corporate action events is provided via Xact Web Portal.	Information regarding corporate action events is provided via Xact Web Portal. Please note that Xact Web Portal does not display information for Main Paying Agents. Please refer to chapter 3.9 for more information.	

Please note that CASCADE screens used for settlement functionalities (such as KVEE / WE & TR 4) are not affected by this (see also the [chapter on Decision Management](#)). Furthermore, settlement instructions and positions can continue to be viewed from KVBA and KVDU – similar to LMP securities today.

Swift message layout

The layout Swift messages sent by Clearstream during corporate actions events has been documented in the handbooks. Generally, Clearstream aligns with global market standards defined by SMPG where possible.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	The Swift message layout will follow layout already used in OneCAS
	The Swift message layout generally follows the CBF Legacy format as defined in the Connectivity Handbook Part 3	The Swift message layout generally follows the OneCAS format as defined in the Xact via Swift User Guide	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	The Swift message layout generally follows the OneCAS format as defined in the Xact via Swift User Guide	The Swift message layout generally follows the OneCAS format as defined in the Xact via Swift User Guide	

Note: This change is not limited to corporate action messages such as MT564 or MT566. When corporate action events or cash/security movements out of corporate actions are referenced in other Swift messages, this referencing is adapted accordingly.

Following message types are affected: MT54x, MT578, MT536, MT537, MT538, MT586.

Whenever, in these messages, a reference to a corporate action event or a cash/security movements out of a corporate action event processed via OneCAS is done, the references are generally build by the OneCAS system and OneCAS reporting therefore applies.

Swift message subscription

CBF clients can subscribe to the CBF Swift services according to their own particular needs by means of a large number of configuration options in relation to the receipt of messages.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	Swift message subscription for corporate action messages on CBF-issued securities are administered via Xact Web Portal. Existing subscriptions via LIMA will not be migrated by CBF.
	Subscriptions for corporate action messages are administrated via KUSTA. Messages are sent from the sender BIC DAKVDEFFDOM.	Subscriptions for corporate action messages are administrated via Xact Web Portal. Messages are sent from the sender BIC as determined by clients for the subscription in Xact Web Portal: <ul style="list-style-type: none"> • CEDELULLXXX (default); • DAKVDEFFDOM; or • DAKVDEFFONE. 	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	Subscriptions for corporate action messages are administrated via Xact Web Portal. Messages are sent from the sender BIC as determined by clients for the subscription in Xact Web Portal: <ul style="list-style-type: none"> • CEDELULLXXX (default); • DAKVDEFFDOM; or • DAKVDEFFONE. 	Subscriptions for corporate action messages are administrated via Xact Web Portal. Messages are sent from the sender BIC as determined by clients for the subscription in Xact Web Portal: <ul style="list-style-type: none"> • CEDELULLXXX (default); • DAKVDEFFDOM; or • DAKVDEFFONE. 	

The current corporate action message subscription for non-CBF-issued securities (including LMP markets) will apply for migrated DE securities. Clients should verify if the existing subscription corresponds to their current KADI subscription (with regards to the reported events, the scheduling etc.).

At present, subscriptions can already be changed for the implementation date via Xact Web Portal, if changes are required.

Clients not subscribing to the Xact Web Portal are requested to contact Connectivity Support for the report subscription.

Please note that settlement message subscriptions via LIMA or Xact Web Portal will continue to apply.

Referencing and message flow

Clearstream includes references to the corporate action event, previous and related messages or underlying instructions, if applicable, in the reporting message.

The below tables highlight the message flow and the referencing where there are:

1. income events;
2. non-income events;
3. market claim events; and
4. transformation events.

More information is available via the [Connectivity Handbooks](#) or the [Xact via Swift User Guide](#).

Income events

⁴ For KADI:

OTC trades: Client's instruction reference ("AUFTRAGSREFERENZ" in CASCADE) of the delivery or match instruction.

SE trades: Trade number of SE-LION trade, CCP gross trade, Eurex exercise.

C7 trades: The MITI of the underlying C7 SCS trade.

DCP instruction legs: The MITI of the underlying sese.024 is reported.

⁵ For OneCAS: Reference of the underlying settlement instruction (SEME)

KD236 (tax voucher recovery after reversal)	Ad-hoc information sent to affected clients	
KD673		Will not be produced in the future as the report was not generated for more than two years and is thus deemed irrelevant.

UEB-GRUND

The securities transfer reason (UEB-GRUND) is provided if there are manual bookings in CASCADE.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	The field UEB-GRUND and related Swift-qualifier DECL//SETR will no longer be used.
	The optional field UEB-GRUND is provided if there are manual CASCADE bookings. It is mapped into MT54x :70E::DECL//SETR.	The field UEB-GRUND is not used. The security transfer reason is transparent to clients via the Swift-qualifiers CLAI or CORP (:22F::SETR) or TRAN (:22F::STCO). Further information is provided in the narrative.	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	The field UEB-GRUND is not used. The security transfer reason is transparent to clients via the Swift-qualifiers CLAI or CORP (:22F::SETR) or TRAN (:22F::STCO). Further information is provided in the narrative.	The field UEB-GRUND is not used. The security transfer reason is transparent to clients via the Swift-qualifiers CLAI or CORP (:22F::SETR) or TRAN (:22F::STCO). Further information is provided in the narrative.	

Paying agent (PAYA)

Clearstream provides, if available, information on the agent appointed to execute the payment for the corporate action event on behalf of the issuer company/offering party.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	No impact
	The information is provided via field :95Q::PAYA in MT564 and MT566 messages.	The information is provided via field :95Q::PAYA in MT564 and MT566 messages.	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	Information on the paying agent is added in the reporting.
	No information on the paying agent is provided.	The information is provided via field :95Q::PAYA in MT564 and MT566 messages.	

Reporting for full deductions

Clients may choose to deduct positions in order to prevent them from participating in the corporate actions, for example for legal reasons.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	MT564 and MT566 reporting is provided for full deductions.
	If there is a full deduction, then no MT564 and MT566 is provided.	<p>The reporting for events should there be a full deduction is according to the following logic per event:</p> <ul style="list-style-type: none"> • Event with only a cash credit: <ul style="list-style-type: none"> ○ MT564 notification with ELIG = 0 for all eligible positions; ○ No MT566. • Event with a cash credit and parallel security debit (for example, redemption): <ul style="list-style-type: none"> ○ MT564 notification with ELIG = eligible positions; ○ MT564 IPAR with ENTL = 0 for all eligible positions; ○ MT566 shows cash movement at zero and the security movement debit of redeemed securities. • Event with a credit of securities: <ul style="list-style-type: none"> ○ MT564 notification with ELIG = eligible positions; ○ MT564 IPAR with ENTL = 0 for the proceeds where deduction applied (cash or security); ○ MT566 with cash or security movement follows IPAR logic. 	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	No corresponding process.	No corresponding process.	

PFoD reporting U2A

Clearstream provides information regarding PFoDs generated during a corporate action event through U2A connectivity channels.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	Within CASCADE, different screens need to be used to see generated PFoDs. Furthermore, Xact Web Portal can be used.
	Generated PFoDs are shown in KVAI/AK or KVDU/IN.	Generated PFoDs are not shown in KVAI/AK and KVDU/IN. Instead, clients can refer to, for instance, KVAI/AA, KVDU/ID or the settlement instructions in Xact Web Portal.	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	Generated PFoDs are shown as settlement instructions in Xact Web Portal.	Generated PFoDs are shown as settlement instructions in Xact Web Portal.	

Registered shares instructions

The CASCADE instructions types AA01 B (de-registration), AA01 E (introduction of new issue) and AA01 P (registered shares account transfer) are used in the context of registered shares.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI Instructions with type B, E or P are not forwarded to T2S. CASCADE rule with regard to special characters rules apply, meaning that automated connectivity channels such as MQ offer more characters than Swift (character set X).	OneCAS Instructions with type B, E or P are forwarded to T2S. Clients using Swift must continue to use character set X. Client may continue to send special characters according to CASCADE rules via the automated connectivity channels. However, the special characters will be transformed in order to comply with the T2S special character set. Accordingly, clients will receive a transformed text in any future message they receive (e. g. in case of corporate actions on flow). Furthermore, the original TEXT information and REFERENZ-NR will not be present in transformed instructions. Please refer to the table on page 3 of the Connectivity Handbook Part 1 that specifies the character transformations.	Clients need to consider the T2S special character rules for registered shares instructions.
	OneCAS n/a	OneCAS n/a	
Non-CBF-issued securities (except US, CH)	OneCAS n/a	OneCAS n/a	n/a

If clients want to avoid the transformation of special characters, they can use the escape sequence as defined in the [Connectivity Handbook Part 1](#) for Swift messages as well as for the automated connectivity channels (including MQ).

Registered shares payment narrative sese.023

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	No impact
	Clearstream created a sese.023 message for the payment and releases it to T2S. Please refer to the DCP Connectivity Handbook for details on how the narrative in this instruction is built.	Clearstream created a sese.023 message for the payment and releases it to T2S. Please refer to the DCP Connectivity Handbook for details on how the narrative in this instruction is built. To ensure the proper routing within systems, the narrative code "RS-EARM" is added in the narrative	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	n/a	n/a	

Reporting of redemption rate in events with pool factor reduction (PRED)

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	The redemption rate will be calculated differently for PRED events. This leads to a change in reporting in the MT56x messages to clients.
	The redemption rate is calculated on the basis of the current pool factor of the security.	With the migration to OneCAS, the redemption rate will in the future be calculated on the basis of the first pool factor (that is, 1) of the security.	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	No impact
	With the migration to OneCAS, the redemption rate will in the future be calculated on the basis of the first pool factor (that is, 1) of the security.	With the migration to OneCAS, the redemption rate will in the future be calculated on the basis of the first pool factor (that is, 1) of the security.	

KADI:

Current pool factor	New pool factor	Redemption rate
1	0,9	10,00%
0,9	0,8	11,11%
0,8	0,7	12,50%
0,7	0,6	14,29%
0,6	0,5	16,67%
0,5	0,4	20,00%
0,4	0,3	25,00%
0,3	0,2	33,33%
0,2	0,1	50,00%

OneCAS:

Current pool factor	New pool factor	Redemption rate
1	0,9	10,00%
0,9	0,8	10,00%
0,8	0,7	10,00%
0,7	0,6	10,00%
0,6	0,5	10,00%
0,5	0,4	10,00%
0,4	0,3	10,00%
0,3	0,2	10,00%
0,2	0,1	10,00%

Reporting of deduction nominal/amount in narrative

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI Within the standardised fields of the Swift message, the computed nominal and amount (including deductions) are listed in :93B::ELIG (MT564) or :93B::CONB (MT566) as well as within the fields of the movements (CASHMOVE/SECMOVE).	OneCAS Within the standardised fields of the Swift message, the computed nominal and amount (including deductions) are listed in :93B::ELIG (MT564) or :93B::CONB (MT566) as well as within the fields of the movements (CASHMOVE/SECMOVE). In the case of deductions, the related deduction quantity and/or amount is presented in the narrative (:70E::ADTX) as no standardised field exists in the MT56x message. The narrative is generated according to the following logic: Row 1: DEDUCTED QTY + space + sum of deducted nominal Row 2: NOT DELIVERED + space + CCY AMNT / ISIN XXXXXXXXXXXX QTY xxxxx Row 2 is generated according to the movements of the event. In case of multiple movements, for example, both cash and security movement, row 2 is repeated accordingly. Example (dividend payment, that is, only one cash movement): :70E::ADTX//DEDUCTED QTY 20000 NOT DELIVERED EUR AMNT 19800	In the case of deductions, the related deduction quantity and/or amount is additionally presented in the narrative (:70E::ADTX).
	Non-CBF-issued securities (except US, CH)	OneCAS Within the standardised fields of the Swift message, the computed nominal and amount (including deductions) are listed in :93B::ELIG (MT564) or :93B::CONB (MT566) as well as within the fields of the movements (CASHMOVE/SECMOVE).	

Narrative for C7 SCS market claims

Following the migration to C7 SCS, most trades are sent via the T2S flow. As a consequence, the market claim reporting in MT56x messages was changed.

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI	OneCAS	No impact
	Market claim reporting for underlying C7 SCS trades contain the wording "MARKET CLAIM OF A C7 CSC TRADE" in the MT56x.	Market claim reporting for underlying C7 SCS trades contain the wording "MARKET CLAIM OF A C7 CSC TRADE" in the MT56x.	
Non-CBF-issued securities (except US, CH)	OneCAS	OneCAS	The narrative in the MT56x is changed to "MARKET CLAIM OF A C7 CSC TRADE" for C7 SCS trades.
	Following the migration to C7 SCS, most trades are sent via the T2S flow. As a consequence, for LMP securities, market claim reporting for underlying CCP trades contain the wording "MARKET CLAIM OF OTC TRADE" in the MT56x.	Market claim reporting for underlying C7 SCS trades contain the wording "MARKET CLAIM OF A C7 CSC TRADE" in the MT56x.	

Reporting of the taxable/tax-free portion for INTR events

In the context of overall alignment to the SMPG reporting standards and the OneCAS reporting, the portion subject to or free of taxation is no longer reported.

	As-Is Process	Future Process	CBF Customer Impact
CBF-issued securities (including investment funds)	KADI For interest payments, the interest rate used for the payment is reported via 92a::INTP in combination with the applicable tax rates in 92A::TAXR and 92A::ATAX Furthermore, for German securities, the portion which is subject to taxation and the portion which is free from taxation are reported in the CASHMOVE sequence via :92J::GRSS//TXBL or :92J::GRSS//TXBF respectively. Please note that the qualifier is not included in case the value is zero. Example (taxable): :92F::INTP//EUR0,5 :92A::TAXR//25, :92A::ATAX//5,5 :92J::GRSS//TXBL/EUR0,5 Example (non-taxable) : :92F::INTP//EUR0, :92J::GRSS//TXFR/EUR0,	OneCAS For interest payments, the interest rate used for the payment is reported via 92a::INTP in combination with the applicable tax rates in 92A::TAXR and 92A::ATAX The portion which is subject to taxation and the portion which is free from taxation are not reported. Example: :92F::INTP//EUR0,5 :92A::TAXR//25, :92A::ATAX//5,5	Portion subject to or free of taxation is no longer reported for interest events.
	OneCAS For interest payments, the interest rate used for the payment is reported via 92a::INTP in combination with the applicable tax rates in 92A::TAXR and 92A::ATAX The portion which is subject to taxation and the portion which is free from taxation are not reported.		
Non-CBF-issued securities (except US, CH)	OneCAS For interest payments, the interest rate used for the payment is reported via 92a::INTP in combination with the applicable tax rates in 92A::TAXR and 92A::ATAX The portion which is subject to taxation and the portion which is free from taxation are not reported.	OneCAS For interest payments, the interest rate used for the payment is reported via 92a::INTP in combination with the applicable tax rates in 92A::TAXR and 92A::ATAX The portion which is subject to taxation and the portion which is free from taxation are not reported.	No impact

MT566 Reporting for worthless debits

	As-is process	Future process	CBF client impact
CBF-issued securities (including investment funds)	KADI For warrants, MT566 includes the narrative 'WITHDRAWAL OF WORTHLESS SECURITIES' to identify worthless debits. For redemptions, MT566 includes the narrative 'WITHDRAWAL OF WORTHLESS SECURITIES' to identify worthless debits.	OneCAS For warrants (EXWA), MT566 includes uses the CA option 'LAPS' to identify worthless debits. For redemptions (REDM, MCAL), as of 18 September 2023, MT566 includes the narrative 'WITHDRAWAL OF WORTHLESS SECURITIES' to identify worthless debits.	For warrants, the CA Option needs to be used to identify worthless debit. For redemptions, the narrative can be used as from 18 September 2023 to identify worthless debit.
	Non-CBF-issued securities (except US, CH)	OneCAS For warrants (EXWA), MT566 includes uses the CA option 'LAPS' to identify worthless debits. For redemptions (REDM, MCAL), MT566 includes the narrative 'WITHDRAWAL OF WORTHLESS SECURITIES' to identify worthless debits.	

5. Client impact

5.1 CBF clients - Corporate action processing for CBF-issued securities via CBF Asset Servicing (KADI)

This chapter summarises and highlights the most important impacts for CBF clients currently using CBF Asset Servicing (KADI) for the corporate action processing of CBF-issued securities. Full information is available in the respective chapters.

Chapter	Topic	Client impact
Announcement Capture and Event Creation	CORP ID	The CORP ID to be used in announcements and in client's instructions will be created differently (Terminart and BID will no longer be provided, reference format and length will be different for income and non-income events).
Announcement Capture and Event Creation	Events split into multiple announcements	Clearstream will generally announce and process corporate action events within one single event instead of splitting into multiple events.
Payments	T2S DCA	The T2 account is no longer used for any EUR payments resulting from corporate actions.
Payments	Payment suspension [CSDR]	The earliest payment date (EARL) instead of the payment date (PAYD) will be reported as "unknown". The value for PAYD remains unchanged. The new payment date will be reported via EARL when available.
Payments	Blocking of securities versus direct debit for elective events	Instructed positions are always blocked before being debited, not only for EXRI events.
Payments	Fraction handling	CBF will directly pay out the cash compensation from fractional (interim ISIN) positions to clients instead of the paying agent.
Payments	Narrative structure	The content of the narrative will change. Information such as the Terminart (KADI event type) or the BID will no longer be provided in the narrative.
Payments	Partial redemption	Redeeming positions will be blocked in any case, resulting in the respective reporting. Securities quoted as percentage are reported as percentage.
Payments	CORP ID over the entire corporate action event	The CORP ID will no longer change through the corporate action event but always stay the same.
Decision Management	Pending instructions	Clearstream will provide MT567 IPRC//PEND to clients only in specific cases.
Decision Management	Deductions	Clients may optionally use MT565 for deduction. The already existing processes for deductions remain in place.

Chapter	Topic	Client impact
Decision Management	Instructions on sanctioned holdings	Instructions on sanctioned holdings are not processed and according reporting is provided.
Decision Management	Instruction quantity type AMOR	Clients will no longer be able to use the quantity type indicator AMOR.
Reversal and Re-payment	Reversal repayment announcement and reporting	For the client reporting of reversal for voluntary events, MT568 will be used instead of MT564. Generally, MT564 will use the qualifier ADDB REVR instead of CANC.
Reversal and Re-payment	Cancel of reversal repayment	Clearstream will provide extended information in the cancellation message via narrative and reference fields.
Transaction Management	Reporting of transformations	In line with CAJWG standards, the corporate action reporting for transformations via MT564 and MT566 will no longer be available to clients.
Transaction Management	Reference to underlying trade for transformations	Clients will receive the same settlement transaction indicator as in the underlying instruction.
Transaction Management	Market claims and reverse market claims	The MT564 reporting is changed to the OneCAS format (see Chapter 4).
Transaction Management	Internal instructions (01 P)	Market claims and transformations are no longer created for internal instructions (01P).
Transaction Management	Buyer Protection Deadline	The Buyer Protection Deadline will be created and added to the MT564.
Tax Management	Tax breakdown	CBF clients will need to use different channels in order to provide tax breakdown.
Tax Management	Tax voucher	Clients will need to use different channels in order to request tax vouchers. The required data is changed to include the account number instead of the account master. The tax voucher is no longer provided to clients via mail but is instead available for download and printing.
Connectivity and Reporting	Connectivity options (U2A)	Information will no longer be provided via CASCADE PC, clients need to use Xact Web Portal. The information provided for an event may differ.
Connectivity and Reporting	General Swift message layout	The Swift message layout will follow layout already used in OneCAS.
Connectivity and Reporting	Swift message subscription	Swift message subscription for corporate action messages on CBF-issued securities are administered via Xact Web Portal. Existing subscriptions via LIMA will not be migrated by CBF.

Chapter	Topic	Client impact
Connectivity and Reporting	KADI lists	Information will no longer be provided via KADI lists, clients need to use Xact Web Portal or subscribe to Swift. The information provided for an event may differ.
Connectivity and Reporting	UEB-GRUND	The field UEB-GRUND and related Swift-qualifier DECL//SETR will no longer be used.
Connectivity and Reporting	Reporting for full deductions	MT564 and MT566 reporting is provided if there are full deductions.
Connectivity and Reporting	PFoD reporting U2A	Within CASCADE, different screens need to be used to see generated PFoDs. Furthermore, Xact Web Portal can be used.
Connectivity and Reporting	Registered shares instructions	Clients need to consider the T2S special character rules for registered shares instructions.
Connectivity and Reporting	Reporting of redemption rate in events with pool factor reduction (PRED)	The redemption rate will be calculated differently for PRED events. This leads to a change in reporting in the MT56x messages to clients.
Connectivity and Reporting	Reporting of deduction nominal/amount in narrative	In the case of deductions, the related deduction quantity and/or amount is additionally presented in the narrative (:70E::ADTX).

5.2 CBF/CBL/LuxCSD clients - Corporate action processing for CBF-issued securities via OneCAS or via CBL Asset Servicing

This chapter highlights the most important impacts for CBF, CBL and LuxCSD clients currently using OneCAS or CBL Asset Servicing for corporate actions processing of CBF-issued securities.

Please also refer to Announcement [C22009](#) for CBL clients or [L22009](#) for LuxCSD clients.

Chapter	Topic	Client impact
Announcement Capture and Event Creation	Processing of warrants	Reporting on the technical movements will no longer be available to clients.
Payments	Fraction handling	The usage of interim lines is introduced. That is, clients will receive the interim line and need to exchange it for the resulting securities or cash.
Payments	DVOP CHOS	Three additional events are processed: The RHDI/MAND event in order to exchange the parent line to the first interim line, the DVCA/MAND event for the taxable part of the dividend payment and the EXOF/MAND event where the second interim line received in the DVOP/CHOS event will be exchanged into the resulting security.
Payments	PFOD model	The processing of PFoDs generated as part of market claims changes to "gross" processing with a separate tax adjustment.
Decision Management	Instruction event identification	Clients may extend the referencing to include the COAF but are not required to do so.
Decision Management	Deductions	Clients may optionally use MT565 for deduction. The already existing processes for deductions remain in place.
Reversal and Re-payment	Reversal repayment announcement and reporting	For the client reporting of reversal for mandatory non-income events, MT564 will be used instead of MT568, that is, the CRA-reporting will be enhanced.
Reversal and Re-payment	Reversal repayment period	The reversal repayment period is extended to 280 days.
Reversal and Re-payment	Cancel of reversal repayment	Clearstream will provide extended information in the cancellation message via narrative and reference fields.
Transaction Management	Reference to underlying trade for transformations	Clients will receive the same settlement transaction indicator as in the underlying instruction.
Transaction Management	Market and Reverse Claim detection	The detection rules are changed so that only settled underlying instructions are considered for the creation of market claims.
Tax Management	Tax breakdown	The usage of a standing instruction by providing the certificate "Auftrag zur Abrechnung von Erträgen mit dem ermäßigten Kapitalertragsteuersatz i.S.d. § 7 Abs. 1 InvStG" will become possible.

Chapter	Topic	Client impact
Tax Management	Tax adjustment instruction market claim reporting	The processing of tax adjustment instructions for market claims is changed to one pooled instruction per day.
Connectivity and Reporting	Paying agent (PAYA)	Information on the paying agent is added in the reporting.
Connectivity and Reporting	Narrative for C7 SCS market claims	The narrative in the MT56x is changed to "MARKET CLAIM OF A C7 CSC TRADE" for C7 SCS trades.

5.3 CBF/CBL/LuxCSD clients - Corporate action processing for non-CBF issued securities via OneCAS or CBL Asset Servicing

This chapter highlights the most important impacts for CBF, CBL and LuxCSD clients currently using OneCAS or CBL Asset Servicing for the corporate action processing of non-CBF-issued securities. This applies for all markets for CBL and LuxCSD clients but not for CBF clients whereas [US](#), FI, CH markets are excluded as they remain with CBF asset servicing via KADI.

Please also refer to Announcement [C22009](#) for CBL clients or [L22009](#) for LuxCSD clients.

Chapter	Topic	Client impact
Announcement Capture and Event Creation	Processing of warrants	Reporting on the technical movements will no longer be available to clients.
Decision Management	Instruction event identification	Clients may extend the referencing to include the COAF but are not required to do so.
Reversal and Re-payment	Reversal repayment announcement and reporting	For the client reporting of reversal for mandatory non-income events, MT564 will be used instead of MT568, that is, the CRA-reporting will be enhanced.
Reversal and Re-payment	Reversal repayment period	The reversal repayment period is extended to 280 days.
Reversal and Re-payment	Cancel of reversal repayment	Clearstream will provide extended information in the cancellation message via narrative and reference fields.
Transaction Management	Reference to underlying trade for transformations	Clients will receive the same settlement transaction indicator as in the underlying instruction.
Connectivity and Reporting	Paying agent (PAYA)	Information on the paying agent is added in the reporting.
Connectivity and Reporting	Narrative for C7 SCS market claims	The narrative in the MT56x is changed to "MARKET CLAIM OF A C7 CSC TRADE" for C7 SCS trades.

6. Client simulation

Clearstream offers a guided client simulation for the changes introduced by the KADI DE Migration [Phase 2 from 21 May 2024 to 7 June 2024](#).

During this simulation period, clients will be able to receive corporate action event announcements and process the events via their instructions.

The test cases setup is designed by CBF to support clients where specific changes to the current processing for German securities are implemented. That is, corporate action events for which changes are described in this document will generally be considered. Clearstream will create the corporate action events and the necessary holdings in dedicated ISINs. Clients may enter trades or settlement instructions into the simulation environments in order to test corporate action on flow processing.

To ensure the coverage of mandatory events, voluntary events, a combination of mandatory and voluntary events and the booking of cash or securities proceeds, the following events could be proposed to clients for testing. Please note that the list of events is subject to internal validation and may therefore change over time. The up to date version is provided to clients in a dedicated Client Simulation Guideline, [to be published soon under OneClearstream rollout documentation](#).

Clients wishing to participate in the guided simulation have to register. A registration form [will be provided under OneClearstream rollout documentation together with the Client Simulation Guideline](#) and must be submitted to oneclearstream@clearstream.com by [30 April 2024](#). Based on the information provided in the registration form, CBF created necessary settings in OCCT and IMS23.

Please note that clients [who have participated in the previous simulation exercise for CAH Phase 1 are required to register](#) again.

For a successful participation in the client simulation, account and connectivity settings must be available. Clients aiming for an end-to-end test must consider that the message flow towards OCCT via the Swift network requires the use of Test BICs as technical sender and receiver.

As a prerequisite, the Test BIC must be registered with the Swift network. Client participating for the first time can already start to enable the technical setup. This is valid for Xact Web Portal access, RMA key exchange and connectivity testing.

7. Migration approach and cutover

Preparation

Clients are asked to ensure their connectivity settings with sufficient lead time. During the Migration [Phase 2](#) starting on [28 June 2024](#) with effective go-live date [1 July 2024](#), the existing subscription for asset servicing reporting (MT56x) from KADI will **not** be migrated by Clearstream. It will however remain applicable for non-migrated securities (for example, [US/CH securities](#)).

For the migrated securities and events, clients need a message subscription in Xact Web Portal. In case a subscription is already in use for other markets (e. g. FR, IT etc.), this subscription applies also for DE market in the future. If no such subscription is available, clients need to ensure that the necessary reporting is set up in advance of the migration weekend. For this purpose, Xact Web Portal can be used to set up a subscription (please refer to the [video guides](#) or the [User Manual](#)). In case of uncertainties, the Clearstream Connectivity Support team is happy to support.

Important aspects to consider for the subscription:

- Clients need to verify that they have the subscription they require for DE securities in Xact. That is, either a new subscription has to be created or an existing subscription can be amended – or the existing subscription is already sufficient. In case changes are required, this can be done already today via Xact Web Portal.
- Xact Web Portal subscriptions cover all markets. Clients cannot have one subscription for e. g. FR market and another one for DE market.
- KADI subscriptions are on Kontostamm level (4-digit account number), automatically covering all subaccounts. Xact Web Portal subscriptions are on 7-digit subaccount level. Clients should verify that all subaccounts are covered in the existing or new Xact Web Portal subscription.

In addition, access to Xact Web Portal is highly recommended for every client for the following purposes:

- CASCADE screens (for example, KVGI) are no longer available for migrated securities – functionalities will largely be available via Xact Web Portal.
- Managing of message subscriptions is possible and copies of all reporting messages are available.
- Additional new functionalities, e. g. for processing of tax breakdown and voucher, are introduced.

Xact Web Portal administrators are asked to verify their access to Xact Web Portal and that user and access rights are correctly distributed among the operational units. If Xact Web Portal is not yet set up or additional user/access rights are required, please contact the Connectivity Support team

If clients would like to adapt their connectivity settings, they are requested to contact the Connectivity Support team (connect@clearstream.com/ +49 (0) 69 / 211 11590). This team supports the creation and the maintenance of settings in A2A and U2A mode.

Migration weekend

Clearstream will begin to apply the processing changes for corporate action events with the implementation [from 28 to 30 June 2024](#). The implementation approach defines that Clearstream provides a fluid transition for the clients. That is, processing is done either in KADI or in OneCAS, depending on the entitlement date:

- All corporate action events **announced before 1 July 2024** and with an **entitlement date before 1 July 2024** are processed in KADI, following the “as-is” process. That is, any ongoing event at the time of migration will continue to be processed via KADI. In certain cases, mainly complex corporate action events such as two event scenarios (for example, RHD/EXRI), special migration rules apply. Here, Clearstream will provide clients with a list of concerned events during the migration weekend on the [OneClearstream website](#).
- All corporate action events **announced after 1 July 2024** and with an **entitlement date before 1 July 2024**, that is backdated events, are processed in KADI, following the “as-is” process.

- All corporate action events **announced before 1 July 2024** and with an **entitlement date after 1 July 2024** are processed in OneCAS, following the “future” process. During the migration weekend, OneCAS creates a new announcement for the event. For the new announcement, all changes between the CBF Legacy format and the OneCAS format (for example, creation of CORP ID) already apply, meaning that the MT564 sent by OneCAS will differ from the initially provided MT564 by KADI. KADI starts the cancellation process on Friday, **28 June 2024** after end of business. The MT564 messages are distributed as per the current KADI/OneCAS reporting schedules.
- All corporate action events **announced after 1 July 2024** and with an **entitlement date after 1 July 2024** are processed in OneCAS, following the “future” process.

Tax bookings related to an event that was processed prior to the migration will also be handled by the CBF Legacy systems, providing clients with the currently known reporting. Accordingly, tax vouchers for events processed in KADI have to be requested via the existing KADI process.

Meeting events are not in scope of the KADI DE Migration and will be continued to be processed in KADI until the implementation of the General Meeting changes to ISO 20022 as part of the SCE project. Please refer to chapter 2 for a description of corporate action events in scope of the migration.

Further information on the implementation weekend will be provided via separate Migration Guide in due time.

Glossary

Acronym or abbreviation	Description
BIC	Bank Identifier Code
CA	Corporate actions
CBF	Clearstream Banking Frankfurt (CSD)
CBF-i	CBF International 6-series account
CBL	Clearstream Banking Luxembourg (ICSD)
